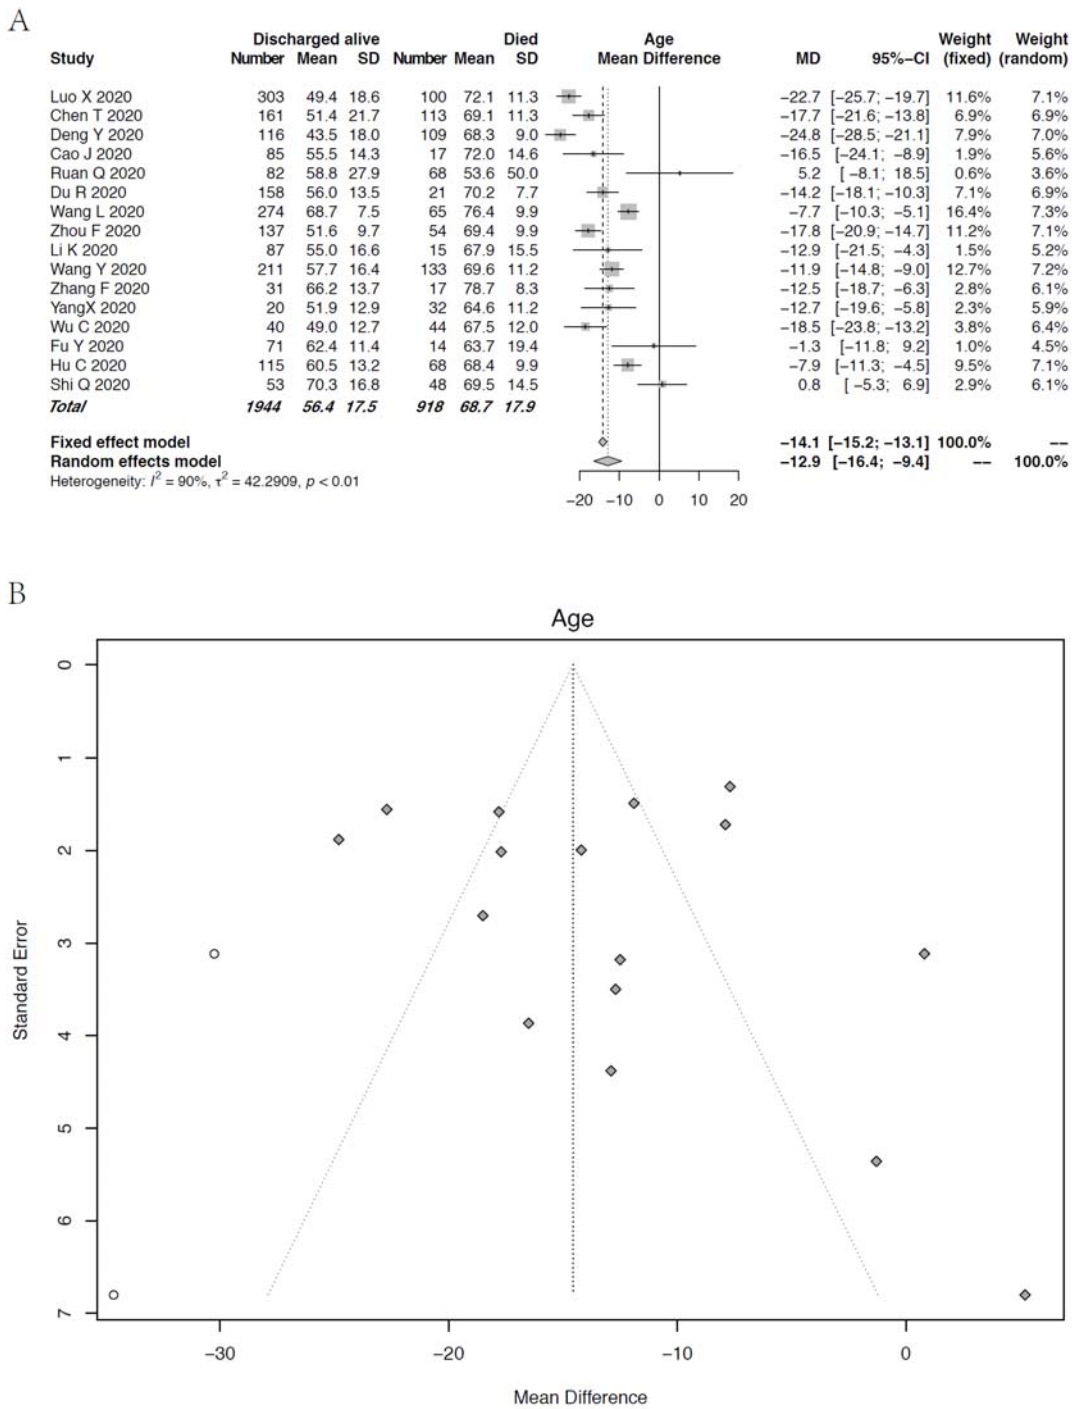
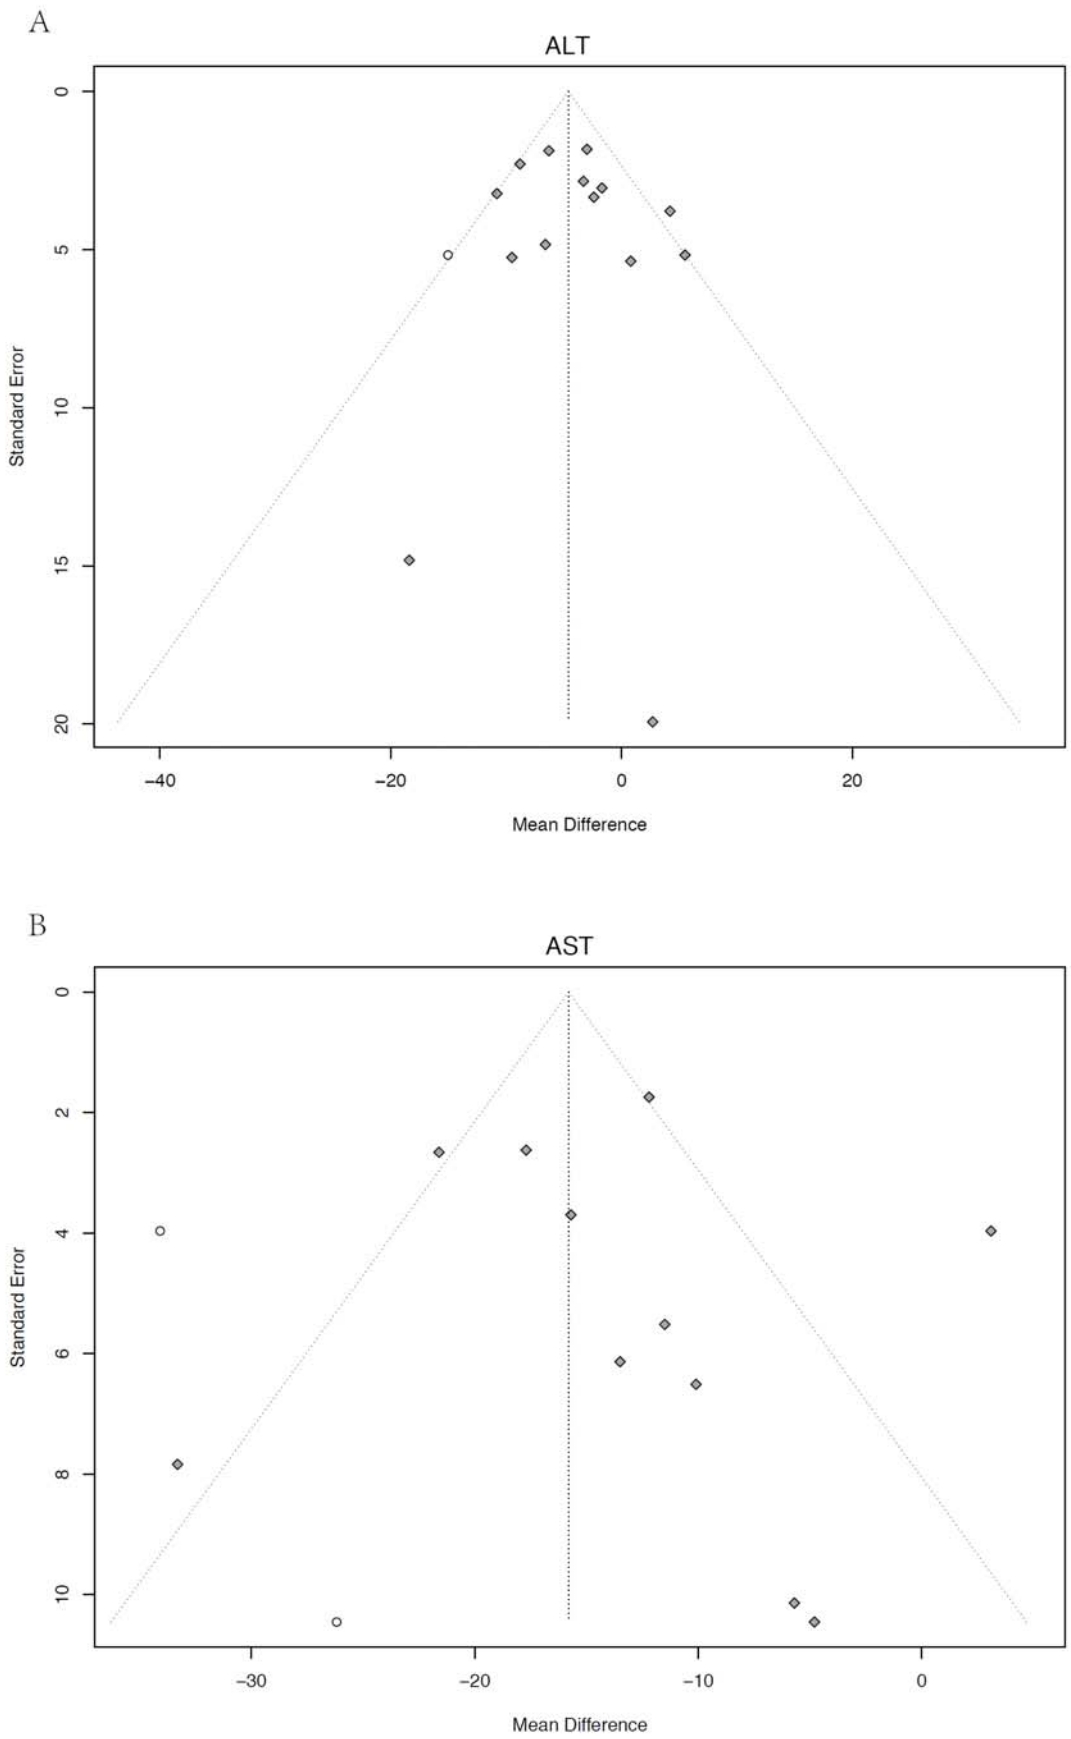
SUPPLEMENTARY FIGURE LEGENDS



Supplementary Figure 1. Association between age and clinical outcome

A, Forest plot for the association of age and clinical outcome. B, Funnel plot for the association of age and clinical outcome.

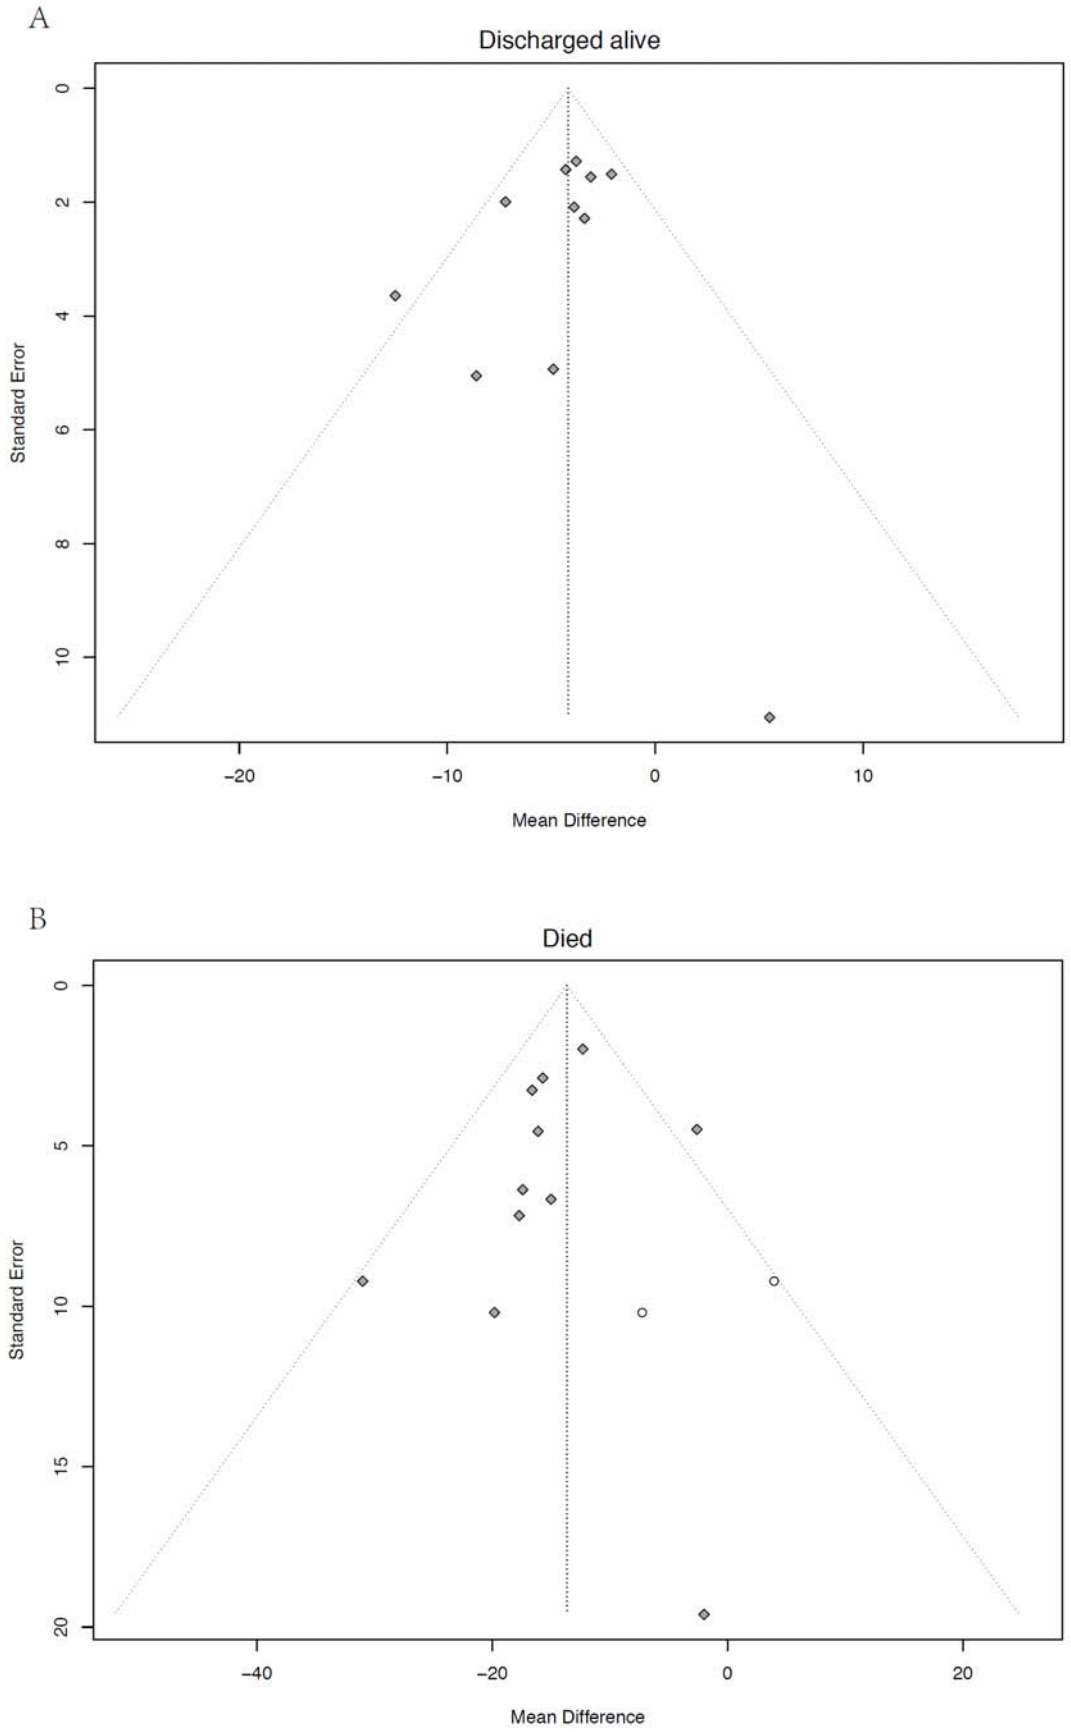


Supplementary Figure 2. Funnel plot for the association of ALT/AST level and

clinical outcome

A, Funnel plot for the association of ALT level and clinical outcome. B, Funnel plot for the association of AST level and clinical outcome.

Abbreviations: ALT, alanine aminotransferase; AST, aspartate aminotransferase.

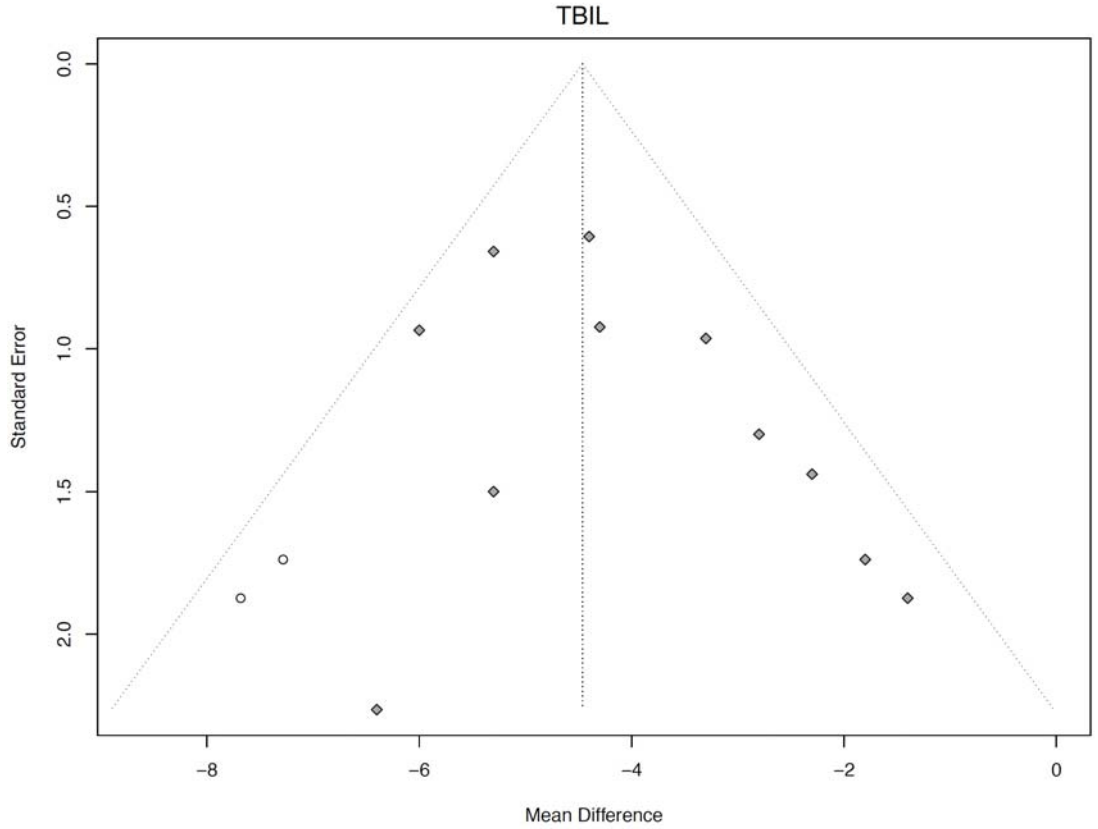


Supplementary Figure 3. Funnel plot for the comparison between ALT and AST

levels stratified by clinical outcome

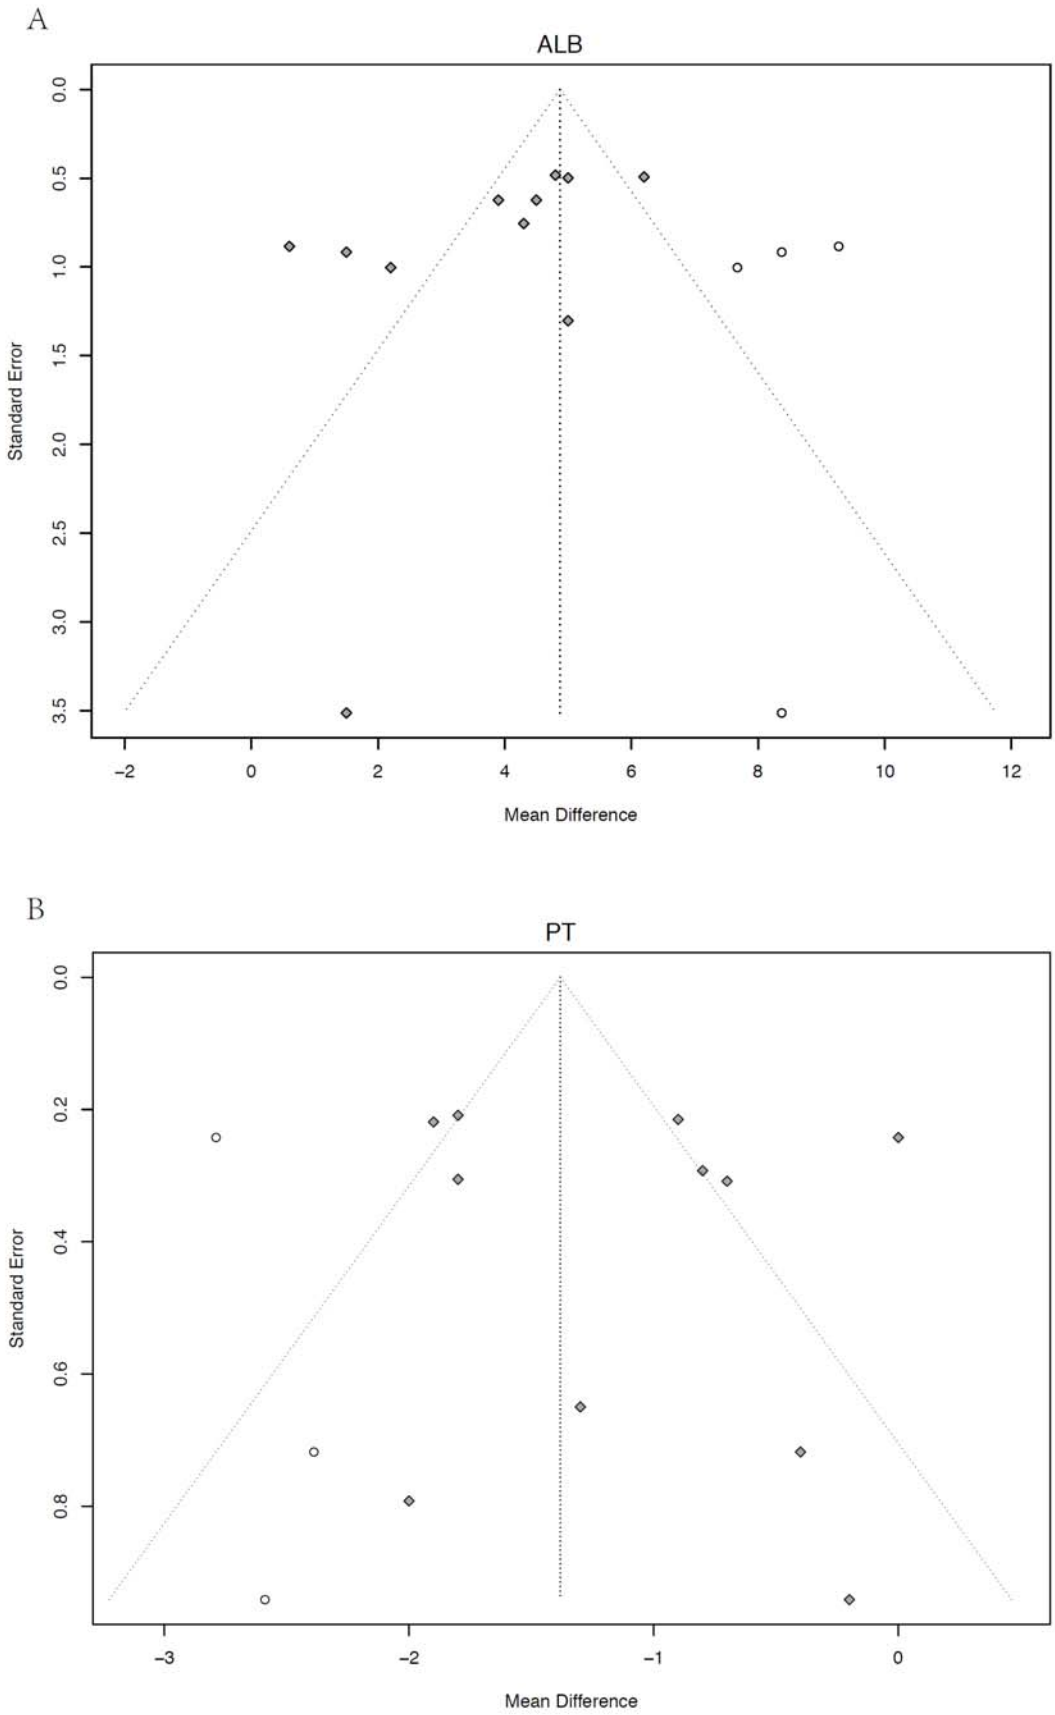
A, Funnel plot for the comparison of ALT and AST levels in the group discharged alive. B, Funnel plot for the comparison between ALT and AST level in the group with dead.

Abbreviations: ALT, alanine aminotransferase; AST, aspartate aminotransferase.



Supplementary Figure 4. Funnel plot for the association of TBIL level and clinical outcome

Abbreviations: TBIL, total bilirubin.



Supplementary Figure 5. Funnel plot for the association of ALB level/PT and clinical

outcome

A, Funnel plot for the association of ALB level and clinical outcome. B, Funnel plot for the association of PT and disease severity.

Abbreviations: ALB, albumin; PT, prothrombin time.
