Hydroxychloroquine plus azithromycin: a potential interest in reducing in-hospital morbidity due to COVID-19 pneumonia (HI-ZY-COVID)?

Benjamin Davido¹, Thibaud Lansaman², Christine Lawrence³, Jean-Claude Alvarez⁴, Frédérique Bouchand⁵, Pierre Moine⁶, Véronique Perronne¹, Aurelie Le Gal¹, Djillali Annane⁶, Christian Perronne¹, Pierre De Truchis¹, on behalf of the COVID-19 RPC Team*

“The authors have withdrawn this manuscript and do not wish it to be cited. Because of controversy about hydroxychloroquine and the retrospective nature of their study, they intend to revise the manuscript after peer review"
