

Misinformation on covid-19 origin and its relationship with perception and knowledge about social distancing: A cross-sectional study

TRANSLATED DATA COLLECTION INSTRUMENT

THE PERCEPCOVID PROJECT

ONLINE SURVEY

BEFORE YOU BEGIN, YOU MUST READ THE DATA ON THE FOLLOWING PAGES CAREFULLY

whose purpose is to guarantee the quality and privacy of the data provided by you

What is the purpose of this survey?

This survey is intended to collect data for an independent investigation whose objective is to know the perception that Dominicans have about the origin of COVID-19 and social distancing. Doctors L. Reyes, Y. Luciano and L. Ortiz. (United States) and the specialist in Internal Medicine Pablo J. Reyes R. are those who are carrying out this project. This research has been approved by a duly certified bioethics committee to ensure compliance with the guidelines of the National Council for Bioethics in Health (CONABIOS), the regulatory body for research on human beings in the Dominican Republic.

Why have you been invited to participate in this study and what are the implications?

You have been invited to participate because due to your Dominican nationality, being 18 years old or older and being a witness of the current pandemic COVID-19 pandemic. Your participation is completely voluntary. You can decide to participate or not in the study and, if so, you can withdraw at any time by exiting this window, and in no way will you be questioned or penalized for your decision. Neither you nor the researchers will receive any monetary compensation during the development of this research. NO private data will be collected such as your name, IP address, telephone, e-mail, among others, and the data you provide will be used only for academic purposes. The researchers are NOT affiliated with the Dominican government OR any for-profit organizations nor receive external funding. Participating in this research does NOT pose any risk to your health. However, some questions in the survey may be uncomfortable for you.
