

S6 Table. Summary of model parameters describing isolation measures.

Parameter	Definition	Value
t_{Iso_1}	Day of beginning of case isolation measures	30
t_{Iso_2}	Day of end of case isolation measures	365
t_{Dist_1}	Day of beginning of contact reduction measures	30
t_{Dist_2}	Day of end of general contact reduction measures end	105
Q_{max}	Maximum capacity of isolation units per 10 000	200
p_{Home}	Contact reduction in home isolation	75%
$p_{\text{Cont}}^{(\text{Ge})}$	Fraction of contacts avoided by Ge by general contact reduction	75%
$p_{\text{Cont}}^{(\text{St})}$	Fraction of contacts avoided by St by general contact reduction	75%
$p_{\text{Cont}}^{(\text{Ri})}$	Fraction of contacts avoided by Ri by general contact reduction	50%
$p_{\text{Cont}}^{(\text{Ge,Ri})}$	Fraction of contacts avoided between Ri and Ge by general contact reduction	95%
$p_{\text{Cont}}^{\text{o}(\text{Ge,Ri})}$	Fraction of contacts avoided between Ri and Ge by restricted facility access	85%
$s_P^{(\text{Ge})}$	Fraction of prodromal Ge that cannot enter LTCF due to pos. test	0
$s_I^{(\text{Ge})}$	Fraction of non-quarantined fully contagious Ge that cannot enter LTCF due to pos. test	0
$s_L^{(\text{Ge})}$	Fraction of non-quarantine late infected Ge that cannot enter LTCF due to pos. test	0

Description of parameters and their choices for simulations.
