Supplementary figure 3. Timing of the imports and exports to Scottish Health Boards for data to 2020-08-18 (see Methods). Results for Orkney, Shetland and the Western Isles are not included as there are too few sequences. The four plots for each NHS Health Board are as follows: top plot -- imports coloured by first NHS Health Board lineage detected in (rainbow colours) or England (red), Wales (green), Northern Ireland (purple). Note that the England (red) is a major source for both NHS Greater Glasgow and Clyde and Lothian in March; second row plot -- exports (same colouring as imports); third row plot -- within region transmissions coloured according to UK lineage number (other rainbow colours); bottom plot -- number of sequences per NHS Health Board coloured by UK lineage number (same as third row). For the summary tables, pre is before 23 March 2020, mid is 23 March - 10 July 2020, and post is after 10 July 2020.
