

**Supplementary Table S1:** Equations for the linear mixed models

<b>Model</b>	<b>Equation</b>
obesity-stratified	$T2D \sim (cAge \times sex) + (cAge^2 \times sex) + cAge + sex + cAge^2 + gt + \ln BMI + k$
	$\ln FG \sim (cAge \times sex) + (cAge^2 \times sex) + cAge + sex + cAge^2 + gt + \ln BMI + k$
genotype-stratified	$T2D \sim (cAge \times sex) + (cAge^2 \times sex) + cAge + sex + cAge^2 + \ln BMI + k$
	$\ln FG \sim (cAge \times sex) + (cAge^2 \times sex) + cAge + sex + cAge^2 + \ln BMI + k$

T2D = type 2 diabetes, k = kinship random effect, gt = additive rs373863828 genotype, cAge = centered and scaled age

**Supplementary Table S2:** Effect of (a) lnBMI and (b) rs37386388 on type 2 diabetes and fasting glucose in each cohort, stratified by obesity status

Obesity-stratified: with obesity

Cohort	Effect
2010 Samoan	0.023
2002-03 Samoan	0.127
1990-95 Samoan	0.232

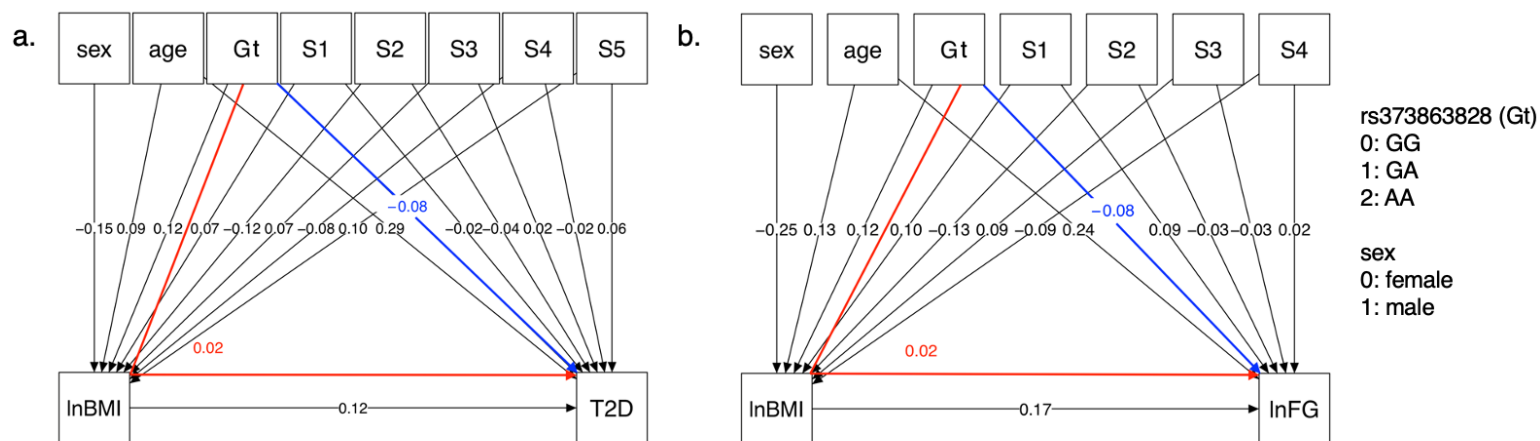

Summary 0.093

Test of heterogeneity:  $\chi^2 = 3.21$ ;  $I^2 = 37.7$ ;  $p = 0.201$

**Caption:** Forest plots for a comparison of the cohort odds ratios (OR) and 95% confidence intervals in the (a) genotype-stratified and (c) obesity-stratified models with type 2 diabetes as the dependent variable and a comparison of the cohort effect sizes and 95% confidence intervals in the (b) genotype-stratified and (d) obesity-stratified models with lnFG as the dependent variable. In the genotype-stratified analyses (a), there were too few type 2 diabetes cases to run the analyses in the 2002-03 Samoan, 1990-95 Samoan, and Aotearoa New Zealand cohorts.

**Supplementary Figure S2: Pooled analysis Path Analysis Model with Study Cohort Variables**

**Caption:** When study cohort variables (S1 – S5) are included in the model, the rs373863828 genotype (Gt) has both direct (blue) and indirect (red) effects on (a) type 2 diabetes (T2D) and (b) lnFG as mediated by lnBMI. For (a), the RMSEA is  $< 0.001$  (90% CI 0.000–0.020) indicating that the path model is a very good fit. For (b), the RMSEA is  $< 0.064$  (90% CI 0.041–0.090) indicating that the path model is a mediocre fit.
