

Supplementary table 1: Observed and predicted mortality rates with 95% prediction intervals for all analysed items in the EU Shortlist for Causes of Death and deaths from COVID-19. Diseases and level 1 (EU shortlist main chapters) in bold. Level 3 in italics. Rates (per 100 000) are age-standardised. Predictions are based on age-standardised rates adjusted to 100% coverage, adjusting for cases with unknown cause of death. *Respiratory diseases also presented with COVID-19 (officially not in EU shortlist chapter 8).
