

**Appendix.** Carnegie Mellon University (CMU) Delphi Group’s COVID-19 Survey: select questions and response sets.

The survey questions used in this report are provided below. The survey was revised on March 2, 2021 (wave 10); however, all questions needed for this report existed on the version fielded March 1, 2021 (wave 8, deployed February 8, 2021; there is no wave 9), so we combined data from the two waves to assess vaccine hesitancy in March 2021. Earlier versions of the questionnaire used in January and February asked the same questions about age and willingness to accept a vaccine, were it offered, which were used to estimate vaccine hesitancy for those months. The full questionnaire and revisions history can be seen online: <https://cmu-delphi.github.io/delphi-epidata/symptom-survey/coding.html> Occupational categories were adapted from the Bureau of Labor Statistics Standard Occupational Classification.
