Cooperating centers-
1. Department of Woman, Child, and General and Specialized Surgery- University of Campania Luigi Vanvitelli, Napoli, Italy
2. Department of Hygiene and Epidemiology, Pomeranian Medical University in Szczecin
3. Endometriosis New Zealand
4. World Endometriosis Organizations
5. Turkish endometriosis and Adenomyosis Society

We would like to thank important individuals who, in many different ways, made this study possible and helped us through the way.

1. Dr. Joanna Nieznanowska, our dear teacher
2. Deborah Bush, World Endometriosis Organizations principal, Chief Executive Endometriosis New Zealand, and World Endometriosis Society Board Trustee for her tremendous help, support and true belief in our international study. She always found time to consult, guide and refer the research team to the right sources in order to achieve voluble, credible and significant results. We would also like to thank her for her mission- leading the world to a better understanding of endometriosis and her mission to increase the research of endometriosis
3. Miguel Gallego

Organizations:
1. Endometriose-Vereinigung Deutschland e.V.
2. Association EndoFrance
3. ENDOMind Franc/ endofrance
4. Endometrioseforeningen Norge
5. Endometriosis Israel
6. Endometriosis New Zealand
7. Endometriosisföreningen Sverige
8. Sana Kardar, Biomedical Science (2015), University of London
9. World Endometriosis Organization- the large global cohort reflected in this research demonstrates how those with endometriosis, research teams and clinicians can collaborate to expand knowledge and insights to advance understanding of endometriosis and its serious human impact. The impact of Covid-19 on those with endometriosis has world-wide relevance in all settings
