**Anterior nuclei:** (AV= anteroventral);

**Lateral nuclei:** (LD= laterodorsal, LP= lateral posterior);

**Ventral nuclei:** (VA= ventral anterior, Vamc= ventral anterior magnocellular , VLa= ventral lateral anterior, VLp= ventral lateral posterior, VPL= ventral posterolateral, VM= ventromedial;

**Intralaminar nuclei:** (CeM= central medial, CL= central lateral, Pc=paracentral, CM= centromedian Pf= parafascicular);

**Medial nuclei:** (Pt= paratenial, MV-re= reuniens (medial ventral), MDm= mediodorsal medial magnocellular, MDl= mediodorsal lateral parvocellular)

**Posterior nuclei:** (LGN=lateral geniculate, MGN= medial geniculate, L-SG= limitans (suprageniculate), PuA= pulvinar anterior, PuM= pulvinar medial, PuL= pulvinar lateral, PuI= pulvinar inferior).

<sup>a</sup>For each nucleus, baseline FC and longitudinal change are presented as mean (SD).

<sup>b</sup>p values were analysed by a GLMM corrected by age, gender total intracranial volume, time with participant as a random effect.

<sup>c</sup>q values were calculated following FDR correction using the Benjamini-Hochberg method.
