

**Supplementary Table 2. Conduction disturbance detected by smartwatch leading to therapy**

<b>Patient #</b>	<b>Cardiovascular symptoms</b>	<b>Conduction Abnormalities</b>	<b>Detected by watch</b>	<b>Readmission</b>	<b>Therapy</b>
1#	cardiogenic syncope	af, LBBB, sinus arrest for 8.46 seconds	Yes	Yes	pacemaker
2#	palpitations	frequent ventricular premature	Yes	No	beta-block
3#	no symptoms	third-degree atrioventricular block, sinus arrest for 4.6 seconds	Yes	Yes	pacemaker
4#	palpitations	frequent ventricular premature	Yes	No	potassium chloride for hypokalemia
5#	dizziness, nausea	frequent ventricular premature	Yes	Yes	beta-block
6#	no symptoms	high-degree atrioventricular block	Yes	Yes	pacemaker
7#	dizziness	af, LBBB, prolonged RR interval	Yes	Yes	pacemaker
8#	dizziness	af with hypotension	Yes	Yes	amiodarone
9#	palpitations	frequent atrial premature with IVCD	Yes	No	beta-block

af, atrial fibrillation; IVCD, intraventricular conduction disturbance
