Table S1 A – Table of cognitive outcome measures in adolescents

Table summarising the adolescent subjects' performance on the computer battery of tests. Test outcomes are presented on rows, separated by treatment group. Mean scores and standard deviation (SD) are presented at the baseline, 1 hour post treatment, and 2 hour post treatment assessment time-points. The difference in score to the baseline is also presented for the 1 hour post-treatment, and 2 hour post-treatment assessment time-points.

		Pre-baseline		Post-baseline		Pre-1h		Post-1h		Pre-2.5h		Post-2.5h	
		Mean	SD	Mean	SD	Mean	SD	Mean	SD	Mean	SD	Mean	SD
Heart rate (bpm)	Placebo	70.67	9.79	69.78	13.74	64.89	9.78	66.22	9.6	71.06	11.09	73.33	13.89

Table S1 B – Table of physiological outcomes in adolescents

Table summarising the physiological assessments for the adolescent subjects. Test outcomes are presented on rows, separated by treatment group. Mean scores and standard deviation (SD) are presented for assessment time-points pre- and post- the baseline, 1 hour post-treatment, and 2 hour post-treatment assessment time-points for each of the measurements aside from oxytocin, which was only assessed at baseline and 1-hour post treatment time-points.
