## Search strategy options from Figure 1 and Figure 2

**Figure 1. Categorising the 23 lines of COVID-19 free text**

Priority	Definition
Critical	Removing this line would mean >10 relevant references would have been missed
High	Removing this line would mean <10 relevant references would have been missed
Medium	Removing this line would not affect the number of relevant references but it has >1400 results so that suggests the terms are being used in the literature and could be useful in a sensitive search.
Low	Removing this line would not affect the number of relevant references but it has <750 results so that suggests the terms not often used.
Zero	These lines have zero and so have never been used in the literature.

### Note:

- The limits on line 7 are optional.
- The strategy is designed for the NICE remit on COVID-19 and SARS-CoV-2.
- It is not configured for Long Covid, which should be searched separately.
- It does not aim to comprehensively cover other coronaviruses (such as MERS or SARS).
