

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
<b>Domain: Care site</b>					
General paediatrics	<b>Type of admission</b>	standardized options	Elective admission Emergency admission	Mandatory	
General paediatrics	<b>Provenance</b>	standardized options	Other hospital Emergency department Home Other	Mandatory	
General paediatrics	<b>Care Handling Type</b>	standardized options	Inpatient Outpatient	Mandatory	
General paediatrics	<b>Visit start date and time</b>	datetime	YYYY-MM-DD hh:mm:ss	Mandatory	Datetime at which the interaction between individual and the care provider institute started
General paediatrics	<b>Visit end date and time</b>	datetime	YYYY-MM-DD hh:mm:ss	Mandatory	Datetime at which the interaction between individual and the care provider institute stopped
General paediatrics	<b>Datetime of admission</b>	datetime	YYYY-MM-DD hh:mm:ss	Mandatory	Datetime of patient's admission to the care provider institute
General paediatrics	<b>Discharge destination</b>	standardized options	Home Other hospital Institution Other	Mandatory	Location to which the patient is discharged
General paediatrics	<b>Follow-up after discharge / consultation</b>	standardized options	General paediatrician General practitioner Subspecialist Nurse None	Mandatory	Scheduled follow-up at discharge
General paediatrics	<b>Translator needed</b>	standardized options	Yes No Unknown	Recommended	Translator needed for communication between patient and healthcare team
General paediatrics	<b>Hospital</b>	standardized options	See comments	Mandatory	Standardized response options will be name of participating children's hospitals
General paediatrics	<b>Department</b>	standardized options	See comments	Mandatory	Standardized response options will be name of departments of participating children's hospitals
General paediatrics	<b>Unit</b>	standardized options	See comments	Mandatory	Standardized response options will be name of units of participating children's hospitals
Infectious diseases	<b>If coming from another hospital: Country</b>	standardized options	Swiss Federal Statistical Office: ISO code of the country of origin	Mandatory	Country of originating hospital
<b>Domain: Demographics</b>					
General paediatrics	<b>Patient Datetime of birth</b>	datetime	YYYY-MM-DD hh:mm:ss	Mandatory	Datetime of birth of the patient
General paediatrics	<b>Country of birth</b>	standardized options	Swiss Federal Statistical Office: ISO code of the country of origin	Mandatory	Country of birth of the patient
General paediatrics	<b>Place of birth (CH)</b>	number	Postal code (PLZ/NPA)	Mandatory	Municipality of birth of the patient if in Switzerland, coded by postal codes (PLZ/NPA).

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
General paediatrics	<b>Patient administrative gender</b>	standardized options	Male Female Other	Mandatory	
General paediatrics	<b>Address (postal code)</b>	number	Postal code (PLZ/NPA)	Mandatory	Current address of the patient, coded by postal codes (PLZ/NPA). Exact address should also be recorded
General paediatrics	<b>Nationality</b>	standardized options	Swiss Federal Statistical Office: ISO code of the country of origin	Mandatory	Current nationality of the patient
General paediatrics	<b>Date of immigration</b>	date	YYYY-MM-DD	Mandatory	Date of first immigration to Switzerland if born abroad
Infectious diseases	<b>If immigrant: Type of residency permit</b>	standardized options	B C G L F N S undocumented	Optional	
Metabolic diseases	<b>Ethnicity of the mother</b>	standardized options	See comments	Optional	Standard classification to be defined
Metabolic diseases	<b>Ethnicity of the father</b>	standardized options	See comments	Optional	Standard classification to be defined
Rheumatology Pulmonology	<b>Ethnicity of the patient</b>	standardized options	See comments	Optional Recommended	Standard classification to be defined. Optional for rheumatology, recommended for pulmonology.
<b>Domain: Medical history</b>					
General paediatrics	<b>Reason for consultation / for admission</b>	free text		Mandatory	Main reason for consultation or for admission. Standard classification not defined.
General paediatrics	<b>Current medications: Drug name</b>	standardized options	International non-proprietary name	Mandatory	Name of the drug(s) received as inpatient
General paediatrics	<b>Current medications: Route of administration</b>	standardized options	Oral Intravenous Subcutaneous Intramuscular Intrathecal Rectal Inhalation Cutaneous Ocular Nasal Otic Other	Mandatory	
General paediatrics	<b>Current medications: Frequency of administration</b>	number		Mandatory	Number of administrations per 24 hours
General paediatrics	<b>Current medications: Dose</b>	number		Mandatory	Dose given at each administration of the drug

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
General paediatrics	<b>Current medications: Dose unit</b>	standardized options		Mandatory	List of possible units to be defined
General paediatrics	<b>Use of complementary medicine</b>	yes/no		Optional	Patient treated with complementary medicine at home or in hospital
General paediatrics	<b>Birth weight</b>	number		Mandatory	Weight at birth in kg
General paediatrics	<b>Birth length</b>	number		Mandatory	Length at birth in cm
General paediatrics	<b>Birth's head circumference</b>	number		Mandatory	Head circumference at birth in cm
General paediatrics	<b>Delivery mode</b>	standardized options	Caesarean section Instrumental vaginal delivery Spontaneous vaginal delivery	Mandatory	Birth delivery mode
General paediatrics	<b>Gestational age</b>	number		Mandatory	Post-menstrual age at birth in week and days
General paediatrics	<b>Apgar score 1 min</b>	number		Recommended	Apgar score 1 min after birth
General paediatrics	<b>Apgar score 5 min</b>	number		Recommended	Apgar score 5 min after birth
General paediatrics	<b>Apgar score 10 min</b>	number		Recommended	Apgar score 10 min after birth
General paediatrics	<b>Mother's year of birth</b>	number		Mandatory	Year of birth of the mother
General paediatrics	<b>Father's year of birth</b>	number		Mandatory	Year of birth of the father
General paediatrics	<b>Year(s) of birth of sibling(s)</b>	number		Mandatory	Year of birth of sibling(s) if any
General paediatrics	<b>Drug allergies</b>	standardized options	International Nonproprietary Name of drug	Mandatory	Known drug allergies
General paediatrics	<b>Documented food allergies</b>	yes/no		Mandatory	Presence of any documented food allergy
Endocrinology	<b>Age at menarche</b>	number		Mandatory	Age at menarche in years
Endocrinology	<b>Age at thelarche</b>	number		Mandatory	Age at thelarche in years
Endocrinology	<b>Age at pubarche</b>	number		Mandatory	Age at pubarche in years
Endocrinology	<b>Single/Multiple birth</b>	number		Recommended	Number of children born from the same pregnancy as the patient's
Endocrinology	<b>Neonatal hypoglycaemia</b>	standardized options	No Yes, confirmed Yes, reported by patient/family	Recommended	History of hypoglycaemia in the neonatal period
Endocrinology	<b>Neonatal hyperbilirubinemia</b>	standardized options	No Yes, confirmed Yes, reported by patient/family	Recommended	History of hyperbilirubinemia in the neonatal period (only hyperbilirubinemia treated with phototherapy)
Endocrinology Nephrology	<b>Mother's height</b>	number		Mandatory	Height of the mother in cm
Endocrinology Nephrology	<b>Father's height</b>	number		Mandatory	Height of the father in cm
Endocrinology	<b>Mother's age at menarche</b>	number		Mandatory	Age of the mother at menarche in years

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
Endocrinology	<b>Father's puberty</b>	standardized options	Normal Early Late	Mandatory	
Endocrinology	<b>Diabetes in first degree relatives</b>	standardized options	No Yes, Type 1 Yes, Type 2 Yes, Monogenic Unknown	Mandatory	Any type of diabetes in a first degree relative
Endocrinology	<b>Thyroid disorder in first degree relative</b>	yes/no		Mandatory	Presence of thyroid disorder in a first degree relative
Endocrinology	<b>Other auto-immune disorders in first degree relative</b>	yes/no		Recommended	Presence of auto-immune disorder in a first degree relative. With added box for free text to specify the disease.
Endocrinology	<b>Other endocrinopathy in first degree relative</b>	yes/no		Mandatory	Presence of endocrinopathy in a first degree relative. With added box for free text to specify the disease.
Endocrinology	<b>Fertility problems in first degree relative</b>	yes/no		Recommended	Presence of fertility problems in first degree relatives. With added box for free text to specify the disease.
Endocrinology	<b>Severe hypoglycaemia (requiring assistance OR coma)</b>	number		Mandatory	Number of events since last visit
Endocrinology	<b>Mild hypoglycaemia (BG &lt; 3.9mmol/l)</b>	number		Mandatory	Number of events per month
Endocrinology	<b>Ketoacidosis</b>	standardized options	No Yes, managed ambulatorily Yes, with hospitalization	Mandatory	History of ketoacidosis
Endocrinology	<b>Diagnostic of obesity in first degree relative</b>	yes/no		Recommended	Diagnostic of obesity in a first degree relative
Gastroenterology	<b>Nutrition habits</b>	standardized options	No specific diet Vegetarian Vegan Other	Recommended	Nutrition habits of the patient
Gastroenterology Metabolic diseases	<b>Route of feeding</b>	standardized options	Oral Gastrostomy Naso/orogastric tube Intravenous Other	Mandatory	The route(s) by which the patient is fed
Allergy/Immunology	<b>History of rhinoconjunctivitis</b>	standardized options	Yes, reported Yes, documented No	Mandatory	
Allergy/Immunology	<b>History of atopic dermatitis</b>	standardized options	Yes, reported Yes, documented No	Mandatory	
Allergy/Immunology	<b>History of wheezing</b>	standardized options	Yes, reported Yes, documented No	Mandatory	

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
Allergy/Immunology	<b>History of asthma</b>	standardized options	Yes, reported Yes, documented No	Mandatory	
Allergy/Immunology	<b>Respiratory support during first hours of life</b>	standardized options	Yes, reported Yes, documented No	Recommended	Presence of any kind of respiratory support (non-invasive and invasive ventilation) during first hours of life
Allergy/Immunology	<b>Supplemental O2 during first hours of life</b>	standardized options	Yes, reported Yes, documented No	Recommended	Supplemental oxygen administered during first hours of life
Allergy/Immunology	<b>Chronic diarrhea</b>	yes/no		Mandatory	
Allergy/Immunology	<b>Number of hospitalisations for IV antibiotherapy in life</b>	number		Mandatory	
Allergy/Immunology	<b>Maximal number of otitis media in one year</b>	number		Mandatory	
Allergy/Immunology	<b>Number of pneumonias in life</b>	number		Mandatory	
Allergy/Immunology	<b>Number of sinusitis in life</b>	number		Mandatory	
Allergy/Immunology	<b>Number of meningitis in life</b>	number		Mandatory	
Allergy/Immunology	<b>Family history of atopic diseases</b>	yes/no		Mandatory	Presence of atopic diseases in a first degree relative
Allergy/Immunology	<b>Family history of immunodeficiency</b>	yes/no		Mandatory	Presence of immunodeficiency in a first degree relative
Allergy/Immunology	<b>Family history of auto-immune disease</b>	yes/no		Mandatory	Presence of auto-immune disease in a first degree relative
Allergy/Immunology	<b>Family history of angioedema</b>	yes/no		Mandatory	Presence of angioedema in a first degree relative
Allergy/Immunology Gastroenterology	<b>Documented food allergy by oral food challenge</b>	yes/no		Mandatory	Presence of any documented food allergy (diagnosed by physician)
Allergy/Immunology	<b>Hymenoptera venom allergies</b>	standardized options	Yes, reported Yes, documented No	Mandatory	Known documented hymenoptera allergies
Allergy/Immunology	<b>History of anaphylaxis</b>	standardized options	Yes, reported Yes, documented No	Mandatory	History of anaphylaxis
Allergy/Immunology	<b>Autoimmune or inflammatory diseases in the patient</b>	yes/no		Mandatory	Classification for type of autoimmunity (organ specific or systemic) and organ(s) involved will be further defined.
Infectious diseases	<b>History of fever (&gt;38°C)</b>	yes/no		Mandatory	
Infectious diseases	<b>If history of fever: Number of days with fever</b>	number		Mandatory	
Infectious diseases	<b>History of cough</b>	yes/no		Mandatory	

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
Infectious diseases	<b>History of running nose</b>	yes/no		Mandatory	
Infectious diseases	<b>History of diarrhea</b>	yes/no		Mandatory	
Infectious diseases	<b>History of vomiting</b>	yes/no		Mandatory	
Infectious diseases	<b>History of headache</b>	yes/no		Mandatory	
Infectious diseases	<b>Travel history in the last 6 months</b>	standardized options	Swiss Federal Statistical Office: ISO code of the country of origin (selection of >1 possible)	Mandatory	Country(ies) visited in the last 6 months
Infectious diseases	<b>History of tick bite</b>	yes/no		Recommended	
Infectious diseases	<b>If history of tick bite: Month of tick bite</b>	date	YYYY-MM	Recommended	
Infectious diseases	<b>History of contact with animals</b>	yes/no	No Yes	Optional	Standard animal list to be defined
Infectious diseases	<b>Pertussis immunization during pregnancy</b>	yes/no		Mandatory	For patients under 6 months of age
Infectious diseases	<b>Influenza immunization during pregnancy</b>	yes/no		Mandatory	For patients under 6 months of age
Infectious diseases	<b>Prolonged rupture of membranes</b>	yes/no		Mandatory	For patients under 1 month of age. Prolonged rupture defined as longer than 18h
Infectious diseases	<b>Maternal GBS colonization</b>	standardized options	Positive Negative Unknown	Mandatory	For patients under 1 month of age
Infectious diseases	<b>Maternal HIV serology</b>	standardized options	Positive Negative Unknown	Mandatory	For patients under 1 month of age
Infectious diseases	<b>Maternal HBsAg</b>	standardized options	Positive Negative Unknown	Mandatory	For patients under 1 month of age
Infectious diseases	<b>Maternal HBsAb</b>	standardized options	Positive Negative Unknown	Mandatory	For patients under 1 month of age
Infectious diseases	<b>Maternal HBcAb</b>	standardized options	Positive Negative Unknown	Mandatory	For patients under 1 month of age
Infectious diseases	<b>Maternal HBeAg</b>	standardized options	Positive Negative Unknown	Mandatory	For patients under 1 month of age
Infectious diseases	<b>Maternal HCV serology</b>	standardized options	Positive Negative Unknown	Mandatory	For patients under 1 month of age
Infectious diseases	<b>Maternal CMV serology (IgG / IgM)</b>	standardized options	Positive Negative Unknown	Optional	For patients under 1 month of age

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
Infectious diseases	<b>Maternal syphilis serology</b>	standardized options	Positive Negative Unknown	Mandatory	For patients under 1 month of age
Infectious diseases	<b>Maternal rubella serology</b>	standardized options	Positive Negative Unknown	Mandatory	For patients under 1 month of age
Infectious diseases	<b>Maternal toxoplasmosis serology</b>	standardized options	Positive Negative Unknown	optional	For patients under 1 month of age
Infectious diseases	<b>Maternal Chagas serology</b>	standardized options	Positive Negative Unknown	Mandatory	For patients under 1 month of age
Metabolic diseases	<b>Self-monitoring of blood glucose</b>	yes/no		Optional	Regular self-monitoring of blood glucose done at home
Metabolic diseases	<b>Self-monitoring of ketone bodies</b>	yes/no		Optional	Regular self-monitoring of ketone bodies done at home
Nephrology	<b>Prenatal ultrasound</b>	standardized option	Normal An-/Oligohydramnios Polyhydramnios Megacystis Megaureter Bilateral renal pelvis dilatation > 10 mm Bilateral renal pelvis dilatation < 10 mm Unilateral renal pelvis dilatation > 10 mm Renal cysts Renal agenesis or ectopia Multicystic-dysplastic kidney and bladder extrophy	Mandatory	
Nephrology	<b>Family history of renal disease (1st-2nd degree)</b>	yes/no		Mandatory	
Neurology	<b>Seizure type (ILEA 2017 Classification of Seizures)</b>	standardized options	Focal Onset Generalized Onset Unknown Onset Unclassified	Recommended	Seizure type according to the ILEA 2017 classification of seizures
Neurology	<b>Family history of neurological diseases</b>	yes/no		Recommended	Family history of any type of neurological diseases
Pulmonology	<b>Cough</b>	standardized options	No Yes, acute and dry Yes, acute and wet Yes, chronic and dry Yes, chronic and wet	Recommended	Cut-off for acute/chronic 4 weeks
Rheumatology	<b>Recurrent fever</b>	yes/no		Mandatory	History of recurrent fever

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
Rheumatology	<b>History of uveitis</b>	yes/no		Mandatory	Presence of active uveitis
Rheumatology	<b>History of inflammatory skin disease</b>	yes/no		Mandatory	Presence of skin involvement
Rheumatology	<b>Family history of inflammatory rheumatic disease</b>	standardized options	No Yes, without spondyloarthropathy Yes, with spondyloarthropathy	Mandatory	Presence of any rheumatic disease in the family
Rheumatology	<b>Family history of inflammatory skin disease</b>	standardized options	No Yes, without psoriasis Yes, with psoriasis	Mandatory	Presence of any skin disease in the family
Rheumatology	<b>Family history of chronic intestinal diseases</b>	yes/no		Mandatory	Presence of any chronic intestinal disease in the family
Rheumatology	<b>Family history of recurrent fever</b>	yes/no		Mandatory	Presence of recurrent fever in the family
<b>Domain: Physical examination</b>					
General paediatrics	<b>Heart rate</b>	number		Mandatory	Heart rate in beats per minute
General paediatrics	<b>Systolic blood pressure</b>	number		Mandatory	Value of the systolic blood pressure in mmHg
General paediatrics	<b>Diastolic blood pressure</b>	number		Mandatory	Value of the diastolic blood pressure in mmHg
General paediatrics	<b>Respiratory rate</b>	number		Mandatory	Respiratory rate in breaths per minute
General paediatrics	<b>Oxygen saturation</b>	number		Mandatory	Measured oxygen saturation in %
General paediatrics	<b>Temperature</b>	number		Mandatory	Measured temperature of the patient in Celsius degrees
General paediatrics	<b>Weight</b>	number		Mandatory	Measured weight of the patient in kg
General paediatrics	<b>Height</b>	number		Mandatory	Measured height of the patient in cm
General paediatrics	<b>Head circumference</b>	number		Mandatory	Measured head circumference of the patient in cm
Endocrinology	<b>Sitting height</b>	number		Recommended	Sitting height measured sitting with straight back in in cm
Endocrinology	<b>Arm span</b>	number		Recommended	Arm span: arms stretched horizontally, measurement from fingertip to fingertip in cm
Endocrinology	<b>Waist circumference</b>	number		Recommended	In cm
Endocrinology	<b>Hip circumference</b>	number		Recommended	In cm
Endocrinology	<b>Goiter</b>	yes/no		Recommended	Presence of goiter
Endocrinology	<b>Gynecomastia</b>	standardized options	No Yes, unilateral Yes, bilateral	Recommended	Presence of gynecomastia
Endocrinology Metabolic diseases	<b>Dysmorphic signs</b>	yes/no		Recommended	Presence of dysmorphic features. If answer is yes, specification with standardized classification to be defined.

**Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0**

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
Endocrinology	<b>Cryptorchidism</b>	standardized options	No Yes, unilateral Yes, bilateral	Mandatory	Presence of cryptorchidism
Endocrinology	<b>Insulin injection site</b>	standardized options	Normal Abnormal, lipoatrophy Abnormal, lipohypertrophy	Optional	Inspection of insulin delivery sites
Endocrinology	<b>Retinopathy screening</b>	normal/abnormal		Optional	
Endocrinology	<b>Neuropathy screening performed</b>	standardized options	No Yes, vibration Yes, monofilament	Optional	
Endocrinology	<b>Testis volume right side</b>	number		Mandatory	Volume of right testis in ml
Endocrinology	<b>Testis volume left side</b>	number		Mandatory	Volume of left testis in ml
Endocrinology	<b>Tanner breast stage</b>	number		Mandatory	
Endocrinology	<b>Tanner pubic hair stage</b>	number		Mandatory	
Endocrinology	<b>Tanner axillary hair stage</b>	number		Mandatory	
Endocrinology	<b>Tanner genital stage</b>	number		Recommended	
Endocrinology	<b>Breast size</b>	number		Optional	In cm
Endocrinology	<b>Female genital examination</b>	normal/abnormal		Mandatory	
Endocrinology	<b>Penis length</b>	number		Recommended	In cm
Endocrinology	<b>Chovstek sign</b>	yes/no		Recommended	Twitching of facial muscles in response to tapping over the area of the facial nerve
Endocrinology	<b>Trousseau sign</b>	yes/no		Recommended	Carpopedal spasm that results from ischemia
Endocrinology	<b>Thyroid nodule</b>	yes/no		Recommended	Presence of thyroid nodule
Infectious diseases Metabolic diseases Rheumatology	<b>Hepatomegaly noted at physical examination</b>	yes/no		Mandatory	
Infectious diseases Metabolic diseases Rheumatology	<b>Splenomegaly noted at physical examination</b>	yes/no		Mandatory	
Infectious diseases	<b>Meningeal signs noted at physical examination</b>	yes/no		Mandatory	
Infectious diseases Rheumatology	<b>Skin lesion noted at physical examination</b>	yes/no		Mandatory	
Infectious diseases	<b>Irritability noted during physical examination</b>	yes/no		Mandatory	
Infectious diseases Rheumatology	<b>Adenopathy noted at physical examination</b>	standardized options	No Yes, localized	Mandatory	

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
			Yes, generalized		
Infectious diseases	<b>Respiratory distress noted at physical examination</b>	yes/no		Mandatory	
Infectious diseases	<b>Conjunctivitis noted at physical examination</b>	yes/no		Mandatory	
Infectious diseases	<b>Prolonged capillary refill time (&gt; 2 sec) noted at physical examination</b>	yes/no		Mandatory	
Infectious diseases	<b>Signs of dehydration noted at physical examination</b>	standardized options	No Yes, < 5% Yes, 5-10% Yes, >10%	Mandatory	
Metabolic diseases	<b>Skin abnormalities</b>	yes/no		Mandatory	Presence of skin abnormalities
Metabolic diseases	<b>Abnormal body proportions</b>	yes/no		Recommended	Presence of abnormal body proportions
Nephrology	<b>Average 24-hour arterial pressure, systolic</b>	number		Mandatory	In mmHg
Nephrology	<b>Average 24-hour arterial pressure, diastolic</b>	number		Mandatory	In mmHg
Nephrology	<b>Average daytime systolic BP</b>	number		Mandatory	In mmHg
Nephrology	<b>Average daytime diastolic BP</b>	number		Mandatory	In mmHg
Nephrology	<b>Average night-time systolic BP</b>	number		Mandatory	In mmHg
Nephrology	<b>Average night-time diastolic BP</b>	number		Mandatory	In mmHg
Nephrology	<b>Mean Arterial Pressure (MAP)</b>	number		Mandatory	Measured MAP in mmHg
Nephrology	<b>Blood pressure dipping pattern</b>	number		Mandatory	Difference between daytime mean systolic pressure and night-time mean systolic pressure expressed as a percentage of the day value
Neurology	<b>Walking ability</b>	standardized options	Community ambulator Household ambulator Non-ambulatory	Mandatory	
Pulmonology	<b>Auscultation</b>	normal/abnormal		Mandatory	
Pulmonology	<b>Thorax shape</b>	normal/abnormal		Mandatory	The shape of the thorax
Rheumatology	<b>Active arthritis</b>	yes/no		Mandatory	Presence of active arthritis
Rheumatology	<b>If active arthritis: number of joints involved</b>	number		Mandatory	Number of joints involved in active arthritis
Rheumatology	<b>Maximal mouth opening</b>	number		Mandatory	Maximal mouth opening in mm
Rheumatology	<b>Muscle strength</b>	normal/abnormal		Recommended	Overall muscle strength

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
<b>Domain: Clinical scores</b>					
General paediatrics	<b>Triage scale (ED), type</b>	standardized options	Australasian Triage Scale Canadian Triage Scale Other	Mandatory	Name of the triage scale used
General paediatrics	<b>Triage scale (ED), value</b>	number		Mandatory	Value of the triage scale
General paediatrics	<b>AVPU score</b>	standardized options	Alert Voice Pain Unresponsive	Mandatory	
General paediatrics	<b>Glasgow Coma Scale</b>	number		Mandatory	
Cardiology	<b>Modified Ross heart failure classification for children</b>	standardized options	Class I Class II Class III Class IV	Mandatory	Class I: Asymptomatic Class II: Mild tachypnea or diaphoresis with feeding in infants, dyspnea on exertion in older children Class III: Marked tachypnea or diaphoresis with feeding in infants, marked dyspnea on exertion, prolonged feeding times with growth failure Class IV: Symptoms such as tachypnea, retractions, grunting or diaphoresis at rest
Cardiology	<b>NYHA classification for adults</b>	standardized options	Class I Class II Class III Class IV	Mandatory	Class I: No symptoms and no limitation in ordinary physical activity Class II: Mild symptoms (mild shortness of breath and/or angina) and slight limitation during ordinary activity. Class III: Marked limitation in activity due to symptoms, even during less-than-ordinary activity. Comfortable only at rest. Class IV: Severe limitations. Experiences symptoms even while at rest. Mostly bedbound patients.
Endocrinology	<b>Endocrinology clinical score type</b>	standardized options	Crook score Billewicz score Ferriman-Gallway score Prader stage External genitalia score	Optional	Type of score
Endocrinology	<b>Endocrinology clinical score result</b>	number	number	Optional	Result of score
Gastroenterology	<b>PCDAI</b>	number		Mandatory	Paediatric Crohn's Disease Activity Index
Gastroenterology	<b>PUCAI</b>	number		Mandatory	Paediatric Ulcerative Colitis Activity Index
Gastroenterology	<b>PYMS score</b>	number		Mandatory	Paediatric Yorkhill Malnutrition Score
Gastroenterology	<b>Bristol stool scale</b>	number		Mandatory	
Allergy/Immunology	<b>SCORAD index</b>	number		Mandatory	SCORing Atopic Dermatitis Index
Metabolic diseases Neurology	<b>Developmental test: Type</b>	standardized options	Bayley II Bayley III	Mandatory	Type of developmental test performed

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
			Griffith Other		
Metabolic diseases Neurology	<b>Development test: Results</b>	normal/abnormal		Mandatory	Result of developmental test performed
Metabolic diseases	<b>Developmental delay</b>	yes/no		Mandatory	Developmental delay as assessed by treating physician
Nephrology	<b>CKD stage</b>	number		Mandatory	Chronic Kidney Disease stage
Pulmonology	<b>Epworth Sleepiness Scale</b>	number		Mandatory	
Pulmonology	<b>Lung-to-Head-Ratio</b>	number		Mandatory	Congenital diaphragmatic hernia
Pulmonology	<b>PICADAR</b>	number		Mandatory	Primary Ciliary Dyskinesia Rule
<b>Domain: Investigations</b>					
General paediatrics	<b>Type of radiological study (detailed)</b>	standardized options	See comments	Mandatory	Standard classification to be defined
General paediatrics	<b>Date and time of imaging study</b>	datetime	YYYY-MM-DD hh:mm:ss	Mandatory	Date and time of the radiological study
General paediatrics	<b>Radiation dose</b>	number		Mandatory	If applicable, dose of radiation in mSv
General paediatrics	<b>Indication for the imaging study</b>	free text		Mandatory	Medical reason for the radiological study
Cardiology	<b>ECG performed</b>	yes/no		Mandatory	Date of study should be recorded
Cardiology	<b>Holter-ECG</b>	yes/no		Mandatory	Date of study should be recorded
Cardiology	<b>Ergometry</b>	yes/no		Mandatory	Date of study should be recorded
Cardiology	<b>Echocardiography performed</b>	yes/no		Mandatory	Detailed standardized echo measurements will be discussed in the future. Date of study should be recorded
Cardiology	<b>Cardiac electrophysiology study performed</b>	yes/no		Mandatory	Date of study should be recorded
Cardiology	<b>Diagnostic cardiac catheterization (hemodynamic study) performed</b>	yes/no		Mandatory	Date of study should be recorded
Endocrinology	<b>Bone age: method</b>	standardized options	Greulich & Pyle BoneXpertR Tanner Whitehouse	Mandatory	Method used to assess radiographic bone age. Date of study should be recorded
Endocrinology	<b>Bone age: result</b>	number		Mandatory	Bone age result in years
Endocrinology Metabolic diseases	<b>Use of continuous glucose monitoring</b>	yes/no		Recommended	Use of glucose sensor
Endocrinology	<b>Number of days per week with continuous glucose monitoring</b>	number		Mandatory	Days per week

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
Endocrinology	<b>Continuous glucose monitoring: Device</b>	standardized options	Freestyle libre Freestyle libre 2 Dexcom G5 Dexcom G6 Medtronic Guardian Medtronic Enlyte	Mandatory	
Endocrinology	<b>Blood glucose self-measurement</b>	number		Mandatory	Number of measures per week
Endocrinology	<b>Scans per day</b>	number		Mandatory	If Flash Glucose Monitoring (FGM) is used
Endocrinology	<b>Blood ketone measurement</b>	number		Mandatory	Number of measures per week
Endocrinology	<b>Mean glucose</b>	number		Mandatory	mmol/l
Endocrinology	<b>Glucose variability</b>	number		Mandatory	%
Endocrinology	<b>Time in range</b>	number		Mandatory	Time between 4.0 and 10.0 mmol/l in %
Endocrinology	<b>Time in hypoglycemia</b>	number		Mandatory	Time < 3.9mmol/l in %
Gastroenterology	<b>Type of gastrointestinal endoscopy</b>	standardized options	Upper Lower Upper and lower Other	Mandatory	Date of study should be recorded
Gastroenterology	<b>Indication for gastrointestinal endoscopy</b>	standardized options	Rectal bleeding Abdominal pain Dysphagia Diarrhea Other	Mandatory	Medical reason for the endoscopic study. Other include for example oesophageal atresia or other anatomical abnormality, food impaction
Gastroenterology	<b>Gastrointestinal endoscopic biopsy</b>	yes/no		Mandatory	Gastrointestinal endoscopic biopsy performed. Date of study should be recorded
Gastroenterology	<b>Impedance-pHmetry</b>	yes/no		Mandatory	Date of study should be recorded
Gastroenterology	<b>Type of breath test</b>	standardized options	Lactose Lactulose Fructose Urea Other	Mandatory	Type of breath test. Date of study should be recorded
Gastroenterology	<b>Capsule endoscopy</b>	yes/no		Mandatory	Date of study should be recorded
Gastroenterology	<b>Endoscopic ultrasound</b>	yes/no		Mandatory	Date of study should be recorded
Gastroenterology	<b>Liver biopsy</b>	yes/no		Mandatory	Date of study should be recorded
Allergy/Immunology	<b>Prick-test performed</b>	yes/no		Mandatory	Date of study should be recorded
Allergy/Immunology Pulmonology	<b>slgE performed</b>	yes/no		Mandatory	slgE stands for specific serum immunoglobulin E. Date of study should be recorded
Allergy/Immunology	<b>Result of slgE</b>	positive/negative		Mandatory	slgE stands for specific serum immunoglobulin E

**Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0**

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
Allergy/Immunology	<b>Result of prick-test</b>	positive/negative		Mandatory	Date of study should be recorded
Allergy/Immunology	<b>Allergen challenge performed</b>	yes/no		Mandatory	Date of study should be recorded
Allergy/Immunology	<b>Allergen challenge result</b>	positive/negative		Mandatory	
Infectious diseases	<b>Urine collection method</b>	standardized options	Urethral catheterization Clean catch void Urine collection bag Mid-stream urine Suprapubic aspiration	Mandatory	Method of collection of urine for culture. Date of study should be recorded
Infectious diseases	<b>Mantoux test</b>	number		Mandatory	In mm. Date of study should be recorded
Infectious diseases	<b>Mantoux test: interpretation</b>	standardized options	Positive Negative Doubtful Unknown	Mandatory	Healthcare provider's interpretation of Mantoux test
Infectious diseases	<b>IGRA result</b>	standardized options	Positive Negative Indeterminate	Mandatory	IGRA stands for Interferon-Gamma Release Assay. Date of study should be recorded
Nephrology	<b>Renal ultrasound result</b>	normal/abnormal		Mandatory	Date of study should be recorded
Nephrology	<b>Renal MRI result</b>	normal/abnormal		Mandatory	Date of study should be recorded
Nephrology	<b>Voiding cystourethrography or kidney microbubble ultrasound results</b>	standardized options	No vesicoureteral reflux Vesicoureteral reflux, unilateral – Grade I Vesicoureteral reflux, unilateral – Grade II Vesicoureteral reflux, unilateral – Grade III Vesicoureteral reflux, unilateral – Grade IV Vesicoureteral reflux, bilateral – Grade I Vesicoureteral reflux, bilateral – Grade II Vesicoureteral reflux, bilateral – Grade III Vesicoureteral reflux, bilateral – Grade IV	Mandatory	Date of study should be recorded
Nephrology	<b>Posterior urethral valves</b>	yes/no			
Nephrology	<b>Renal scintigraphy results</b>	standardized options	Normal Hypoplasia Scars Other	Mandatory	Date of study should be recorded
Nephrology	<b>Estimated GFR by Schwartz formula</b>	number		Mandatory	GFR [ml/min]

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
Nephrology	<b>Proteinuria</b>	number		Mandatory	In mg/mmol (spot-urine) or mg/m2/h for 24h Urine
Nephrology Neurology Pulmonology	<b>Genetic test performed</b>	yes/no		Mandatory Recommended	Mandatory for nephrology, recommended for neurology and pulmonology
Neurology	<b>Neurologic electrophysiologic study: Type</b>	standardized options	EEG EMG AEP SEP VEP Other	Mandatory	EEG: electroencephalogram, EMG: electromyography, AEP: auditory evoked potentials, SEP: somatosensory evoked potentials, VEP: visual evoked potential Date of study should be recorded
Neurology	<b>Neurologic electrophysiologic study: Result</b>	normal/abnormal		Mandatory	
Metabolic diseases Neurology	<b>Hearing test: Type</b>	standardized options	OAE AEP Pure tone audiometry	Mandatory	OAE: otoacoustic emissions, AEP: auditory evoked potentials Date of study should be recorded
Metabolic diseases Neurology	<b>Hearing test: Result</b>	normal/abnormal		Mandatory	
Neurology	<b>Vision test: Performed by</b>	standardized options	Ophtalmologist Optometrist Peadiatrician Other	Recommended	Health professional who tested vision
Neurology	<b>Vision test: Result</b>	normal/abnormal		Recommended	
Neurology	<b>Lumbar puncture performed</b>	yes/no		Mandatory	Date of study should be recorded
Neurology	<b>Opening Pressure at Lumbar Puncture</b>	number		Optional	Opening pressure in cmH2O
Pulmonology	<b>Spirometry performed</b>	yes/no		Mandatory	Date of study should be recorded
Pulmonology	<b>Lung function: RV</b>	number		Recommended	RV: Residual volume. In L
Pulmonology	<b>DLCO</b>	number	Diffusion capacity of the lung for carbon monoxide	Recommended	DLCO: diffusing capacity of the lungs for carbon monoxide. In ml CO/min/mmHg
Pulmonology	<b>Lung function: Bronchodilator administered</b>	yes/no		Mandatory	
Pulmonology	<b>Bronchoscopy performed</b>	yes/no		Mandatory	Date of study should be recorded
Pulmonology	<b>Lung function: Challenge test performed (treadmill, methacholine challenge test)</b>	yes/no		Mandatory	
Pulmonology	<b>Broncho-alveolar lavage performed</b>	yes/no		Mandatory	

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
Pulmonology	<b>Sweat test results</b>	standardized options		Mandatory	Chloride in mmol/l (Macroduct) Conductivity in mmol/l eq NaCl (Nanoduct) Date of study should be recorded
Pulmonology	<b>Sleep studies</b>	standardized options	Polysomnography Respiratory Polygraphy Oximetry	Mandatory	Sleep studies performed Date of study should be recorded
Pulmonology	<b>Lung function: FEV1</b>	number		Mandatory	FEV1: forced expiratory volume-one second. pre/post absolute number in L
Pulmonology	<b>Lung function: FVC</b>	number		Mandatory	FVC: forced vital capacity. Pre/post. In L
Pulmonology	<b>Lung function: TLC</b>	number		Recommended	TLC: Total lung capacity. In L
Pulmonology	<b>Lung function: LCI</b>	number		Recommended	LCI: Lung clearance index. Equipment / gas currently in use in each center
Pulmonology	<b>Lung function: Nasal NO</b>	number		Recommended	Nasal NO: Nasal nitric oxide measurement. in ppb or nl/mn
Pulmonology	<b>Lung function: FeNO</b>	number		Recommended	FeNO: exhaled nitric oxide test. Online or Off-line method. absolute number in ppb
Pulmonology	<b>Lung function: CPET performed</b>	yes/no		Recommended	CPET: Cardiopulmonary Exercise Testing
Pulmonology	<b>Lung function: FEF 25-75</b>	number		Recommended	FEF25-75: Forced expiratory flow over the middle one half of the FVC (force vital capacity). in L/s
Pulmonology	<b>Lung function: FEV 0.75</b>	number		Recommended	FEV 0.75: forced expiratory volume in 3/4 of a second. pre/post. absolute number in L
Pulmonology	<b>Lung function: sRaw</b>	number		Recommended	sRaw: specific airway resistance. kPa/sec
Pulmonology	<b>Lung function: FRC</b>	number		Recommended	FRC: functional residual capacity. in L
Pulmonology	<b>Lung function: FRC: Test</b>	standardized options	Bodyplethysmography MBW	Recommended	MBW: multiple breath washout
<b>Domain: Diagnosis</b>					
General paediatrics	<b>Diagnosis</b>	See comments	See comments	Mandatory	Inpatients diagnosis are ICD10 coded and outpatients diagnosis are free text.
General paediatrics	<b>Date of diagnosis</b>	date	YYYY-MM-DD	Mandatory	
General paediatrics	<b>Cause of death</b>	See comments	See comments	Mandatory	Standard classification to be defined
General paediatrics	<b>Date of death</b>	date	YYYY-MM-DD	Mandatory	
Cardiology	<b>IPCCC diagnosis</b>	standardized options	IPCCC Code	Mandatory	IPCCC: International Paediatric and Congenital Cardiac Code
Allergy/Immunology	<b>Allergic disease confirmation</b>	standardized options	Skin prick test Allergen challenge sIgE	Mandatory	
Infectious diseases	<b>If infectious diagnosis: Type of documentation</b>	standardized options	Clinically documented infection Microbiologically documented infection	Mandatory	

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
Infectious diseases	<b>If infectious diagnosis: Nosocomial</b>	yes/no		Mandatory	
Infectious diseases	<b>If nosocomial infection: Date of first symptom</b>	date	YYYY-MM-DD	Mandatory	
Infectious diseases	<b>If nosocomial infection: Site of infection</b>	standardized options	Respiratory tract Gastro-intestinal tract Urinary tract Surgical site Other	Mandatory	
Metabolic diseases	<b>Diagnosis confirmation</b>	standardized options	Clinical Biochemical Enzymatic Genetic	Mandatory	The way diagnosis has been confirmed
Metabolic diseases	<b>Diagnosis suspicion</b>	standardized options	Prenatal Newborn Selective	Mandatory	The type of screening that led to the diagnosis
Neurology	<b>OMIM code</b>	standardized options	OMIM code	Recommended	OMIM: Online Mendelian Inheritance in Man
Neurology	<b>HPO code</b>	standardized options	HPO code	Optional	HPO: Human Phenotype Ontology
<b>Domain: Treatment</b>					
General paediatrics	<b>Drug name</b>	standardized options	International non-proprietary name	Mandatory	Name of the drug(s) received as inpatient
General paediatrics	<b>Prescribed drug at discharge</b>	standardized options	International non-proprietary name	Mandatory	Name of the drug(s) prescribed at discharge
General paediatrics	<b>Route of administration</b>	standardized options	Oral Intravenous Subcutaneous Intramuscular Intrathecal Rectal Inhalation Cutaneous Ocular Nasal Otic Other	Mandatory	
General paediatrics	<b>Date and time of first administration</b>	datetime	YYYY-MM-DD hh:mm:ss	Mandatory	Time of first administration of the drug
General paediatrics	<b>Date and time of last administration</b>	datetime	YYYY-MM-DD hh:mm:ss	Mandatory	Time of last administration of the drug
General paediatrics	<b>Frequency of administration</b>	number		Mandatory	Number of administrations per 24 hours
General paediatrics	<b>Dose</b>	number		Mandatory	Dose given at each administration of the drug

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
General paediatrics	<b>Dose unit</b>	standardized options		Mandatory	List of possible units to be defined
General paediatrics	<b>Reason for discontinuation of treatment</b>	standardized options	Recovery Change to another medication No effect observable Adverse events Reducing polypharmacy Other	Mandatory	Reason why a treatment is stopped
General paediatrics	<b>Adverse events</b>	standardized options	MedDRA classification	Mandatory	MedDRA: Medical Dictionary for Regulatory Activities
General paediatrics	<b>Supplemental O2: Date and time of start</b>	datetime	YYYY-MM-DD hh:mm:ss	Mandatory	Time at starting oxygen therapy
General paediatrics	<b>Supplemental O2: Date and time of interruption</b>	datetime	YYYY-MM-DD hh:mm:ss	Mandatory	Time at stopping oxygen therapy
General paediatrics	<b>Supportive services: Type</b>	standardized options	Physiotherapy Ergotherapy Social assistance Other	Mandatory	
Endocrinology	<b>Type of insuline therapy</b>	standardized options	MDI CSII	Mandatory	MDI: Multiple dose injection. CSII: Continuous subcutaneous insulin infusion
Endocrinology	<b>Total daily dose of insuline (long and short acting)</b>	number		Mandatory	units per kg per day
Endocrinology	<b>Basal insuline</b>	number		Mandatory	Percentage of basal insuline (%)
Gastroenterology Metabolic diseases	<b>Therapeutic diet</b>	yes/no		Mandatory	Therapeutic diet prescribed by physician
Metabolic diseases	<b>Type of therapeutic diet</b>	standardized options	Low-protein Ketogenic Low-fat Frequent meals Nocturnal feed Medical food Other	Mandatory	Type of therapeutic diet prescribed
Allergy/Immunology	<b>Epinephrine Pen prescribed</b>	yes/no			
Infectious diseases	<b>BCG immunization</b>	standardized options	Yes No Unknown	Mandatory	
Neurology	<b>Rehabilitation supportive devices: Type</b>	standardized options	Upper limb orthoses Lower limb orthoses Corset Standing frame Walking aid (crutches NF-walker, rollator etc.) Wheelchair: Manual	Recommended	

### Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
			Wheelchair: Electric powered Other		
Pulmonology	<b>Pulmonary rehabilitation</b>	yes/no		Recommended	
<b>Domain: Equipment and procedures</b>					
General paediatrics	<b>Equipment type</b>	standardized options	See comments	Mandatory	Standard classification to be defined
General paediatrics	<b>Equipment date of insertion</b>	date	YYYY-MM-DD	Mandatory	
General paediatrics	<b>Equipment date of withdrawal</b>	date	YYYY-MM-DD	Mandatory	
Cardiology	<b>Cardiac procedures</b>	standardized options	IPCCC Code	Mandatory	IPCCC: International Paediatric and Congenital Cardiac Code
Cardiology	<b>Date of cardiac procedure</b>	date	YYYY-MM-DD	Mandatory	Date of intervention
Gastroenterology	<b>Therapeutic gastrointestinal endoscopic procedures</b>	standardized options	Haemostasis Oesophageal dilatation (Balloon/Savary) Percutaneous endoscopic gastrostomy (PEG) Endoscopic retrograde cholangiopancreatography (ERCP) Other	Mandatory	
Nephrology	<b>Type of dialysis (1)</b>	standardized options	Acute Chronic	Mandatory	
Nephrology	<b>Type of dialysis (2)</b>	standardized options	Haemodialysis Peritoneal dialysis Hemodiafiltration	Mandatory	If peritoneal dialysis, type of catheter and number of peritonitis should be specified
Nephrology	<b>Date of dialysis initiation</b>	datetime	YYYY-MM-DD hh:mm:ss	Mandatory	
Nephrology	<b>Date of dialysis termination</b>	datetime	YYYY-MM-DD hh:mm:ss	Mandatory	
Nephrology	<b>Dialysis: vascular access type</b>	standardized option	Central venous catheter Arteriovenous fistula Arteriovenous graft	Mandatory	If central venous catheter, its localization should be specified
Nephrology	<b>Renal transplantation, graft (1)</b>	standardized options	Deceased donor Living donor	Mandatory	
Nephrology	<b>Renal transplantation, graft (2)</b>	standardized options	Related donor Unrelated donor	Mandatory	
Nephrology	<b>Renal transplantation</b>	standardized options	Preemptive transplantation Nonpreemptive transplantation	Mandatory	
Nephrology	<b>Renal transplantation: Number of received grafts</b>	number		Mandatory	Number of grafts received including present one
Nephrology	<b>Plasmapheresis performed</b>	yes/no		Mandatory	

**Appendix 3 : SwissPedData Common Data Model (CDM), Version 1.0**

Module(s)	Common Data Element	Format	Standardized response options	Importance	Comment / Description
Nephrology	<b>Renal biopsy performed</b>	standardized options	No Yes, without complication in the following 24 hours Yes, with complications in the following 24 hours	Mandatory	
Nephrology	<b>Cystoscopy performed</b>	yes/no		Mandatory	
Nephrology	<b>Angiography performed</b>	yes/no		Mandatory
