Supplementary data

Supplementary Table 1: Clinical and radiological parameters of the patients diagnosed with COVID-19.

Patient's Personal Information	CT and CXR Findings	Hospital Data	Clinical History	Travel History	Transmission History	Testing History	Current Status
1. PID 2. Name (RHC) 3. Gender (RHC) 4. Age (RHC) 5. Name (Registered with PMC) 6. Age (Registered with PMC) 7. Sex (Registered with PMC) 8. Address (Detail address of patient) 9. Contact no. 10. Occupation 11. District/ Corporation (by place of residence) 12. State (by patients Residence) 13. Nationality	14. HRCT Score 15. Date of Scan Patterns 16. GGO, 17.Consolidation, 18. Septal thickening, 19. Vascular thickening, 20. Pleural Effusion Location 21. RUL 22. RML 23. RLL 24. LUL 25. LLL	26. Case No. 27. District 28. GoI COVID portal (SSSNO) 29. District / Corporation case number 30. Sr. No.	31. Name of 1st admitted Hospital 32.District/ Corporation of Admitted Hospital 33. Date of 1st admission 34.Symptoms at the time of 1st admission 35. Date of onset of symptoms 36. Presenting symptoms 37. Comorbidity condition 38. Clinical condition at time of admission 39. Treatment Protocol 40. Name of 2nd Hospital 41. Date of admission in 2nd Hospital	42. Travel history outside India 43. If yes Name of Visited Country 44. Travel within India (Yes/No) 45. If yes Name of City 46. Attended mass gathering (Yes/No) 47. If yes, Place & Address of mass gathering	48. COVID-19 +ve family member 49. H/o contact with COVID-19 +ve person 50. Total Number of Contacts 51. No. of contacts admitted 52. No. of contacts at Home 53. No. of samples of contacts sent 54. No. of contacts found Positive	55. Date of 1st Sample Collection 56. sample collection centre 57. Sample tested at 58. Date of result of 1st sample 59. Day -14 Test Date 60. Day-14 Test Result 61. Day-15 Test Date 62. Day-15 Test Result	63. Ward 64.Condition today 65. Swab Status 66. Outcome

Supplementary Figure 1: Random Forest model ranking top 10 clinical variables for predicting mortality associated with COVID-19. The Y-axis indicates the clinical features arranged according to their rank of importance. The X-axis indicates their percent of importance.
