

Supplementary Table 5. Information on clusters remaining significant after whole-brain, cluster-wise correction for multiple comparisons with a cluster-forming threshold $p < .05$

Contrast of interest	Corresponding figure	Region of cluster peak	Max T-value	Peak p-value (uncorrected)	Cluster size (mm ²)
SDQ-20	Figure 2A	L Insula/Precentral	-6.12	<.001	8160
		L Rostral Anterior Cingulate	-4.47	<.001	7480
		R Insula	-5.34	<.001	5768
		L Lateral Orbitofrontal	-4.29	<.001	3408
		Brainstem	-6.00	<.001	3288
		R Isthmus Cingulate	-4.22	<.001	3024
		R Precentral	-6.17	<.001	1600
Illness duration	Figure 2B	L Caudal Anterior Cingulate/Superior Frontal	-4.51	<.001	4608
		R Insula/Pars Opercularis	-5.97	<.001	4392
Emotional neglect	Figure 3A	R Fusiform	5.42	<.001	4648
		L Insula	-6.30	<.001	3624
		R Amygdala/Inferior Temporal	-4.57	<.001	3104
		R Insula/Putamen	-4.75	<.001	3096

Abbreviations: FS=Functional seizures, L=Left, R=Right, SDQ-20=Somatoform Dissociation Questionnaire.
