

Research themes • Humans

Suppl. Figure 1 – Diagram of keyword co-occurrence for the most common keywords, amounting to four fifths of the "humans" theme. Bubble sizes and edges' opacity are proportional to weighted frequency.

Research themes • Primary Health Care

Suppl. Figure 2 – Diagram of keyword co-occurrence for the most common keywords, amounting to two thirds in the "primary health care" theme. Bubble sizes and edges' opacity are proportional to weighted frequency.

Research themes • Animals

Suppl. Figure 3 – Diagram of keyword co-occurrence for the most common keywords, amounting to half the "animals" theme. Bubble sizes and edges' opacity are proportional to weighted frequency.

Suppl. Table 1 – Characteristics of the research themes of family and community physicians in Brazil, up to 2018

Authorship weight is the share of family and community physicians in Brazil among authors, with harmonic authorship counting. Authorship weighing is used for the “weighted” number of articles and keywords, as well as for the mean number of keywords per article. * Research themes without a name are those with no keywords.

Suppl. Table 2 – Postgraduate trajectories of family and community physicians leading to articles, by research theme

Characteristic	Primary Health Care				Animals		Total
	Humans						
Gender *							
Female	95.2	35.3%	59.7	31.1%	16.5	60.7%	205.3 35.8%
Male	174.7	64.7%	132.2	68.9%	10.7	39.3%	367.6 64.2%
Mode of specialization							
Certification	70.5	26.0%	61.7	31.7%	11.7	42.9%	169.8 29.4%
Medical residency	200.6	74.0%	132.9	68.3%	15.5	57.1%	407.7 70.6%
Knowledge area							
None	39.9	14.7%	37.9	19.5%	2.6	9.6%	97.7 16.9%
Medicine	110.4	40.7%	26.6	13.7%	10.0	36.7%	179.2 31.0%
Collective health	81.7	30.1%	80.2	41.2%	2.4	8.7%	191.3 33.1%
Other	39.1	14.4%	49.9	25.6%	12.2	45.0%	109.3 18.9%
Postgraduate degree							
None	39.9	14.7%	37.9	19.5%	2.6	9.6%	97.7 16.9%
Master's	75.6	27.9%	80.6	41.4%	3.3	12.0%	183.9 31.8%
PhD	155.6	57.4%	76.1	39.1%	21.3	78.4%	296.0 51.3%
Year of publication							
1985–1998	16.4	6.1%	6.2	3.2%	0.8	2.8%	28.8 5.0%
1999–2003	17.1	6.3%	1.9	1.0%	1.3	4.8%	23.8 4.1%
2004–2008	50.3	18.6%	25.9	13.3%	6.2	22.9%	94.8 16.4%
2009–2013	80.8	29.8%	77.8	40.0%	5.6	20.5%	191.2 33.1%
2014–2018	106.4	39.3%	82.8	42.6%	13.3	49.1%	239.0 41.4%

Frequencies are weighted by harmonic authorship counting. * It was not possible to infer the gender of 16 family and community physicians, who authored 4.5 (0.8%) articles with weighing.
