

	Item No	Recommendation	Yes/no	Page
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Yes	1
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Yes	1-2
Introduction				
Background/rationale	2	Explain the scientific background and rationale for the investigation being reported	Yes	3-4
Objectives	3	State specific objectives, including any prespecified hypotheses	Yes	4
Methods				
Study design	4	Present key elements of study design early in the paper	Yes	5
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Yes	5
Participants	6	(a) Cohort study—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up Case-control study—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study—Give the eligibility criteria, and the sources and methods of selection of participants	Yes	5-6
		(b) Cohort study—For matched studies, give matching criteria and number of exposed and unexposed Case-control study—For matched studies, give matching criteria and the number of controls per case	NA	
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Yes	6-8
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Yes	7-8
Bias	9	Describe any efforts to address potential sources of bias	Yes	8
Study size	10	Explain how the study size was arrived at	Yes	8
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	Yes	9-10
Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	Yes	9-10
		(b) Describe any methods used to examine subgroups and interactions		
		(c) Explain how missing data were addressed	Yes	8-9
		(d) Cohort study—If applicable, explain how loss to follow-up was addressed Case-control study—If applicable, explain how matching of cases and controls was addressed Cross-sectional study—If applicable, describe analytical methods taking account of sampling strategy	Yes	10
		(e) Describe any sensitivity analyses	NA	
Results				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	Yes	12
		(b) Give reasons for non-participation at each stage	Yes	12
		(c) Consider use of a flow diagram	Yes	12
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	Yes	Table 1
		(b) Indicate number of participants with missing data for each variable of interest	Yes	13
		(c) Cohort study—Summarise follow-up time (eg, average and total amount)	Yes	13
Outcome data	15*	<i>Cohort study—Report numbers of outcome events or summary measures over time</i>	Yes	14
		<i>Case-control study—Report numbers in each exposure category, or summary measures of exposure</i>	NA	
		<i>Cross-sectional study—Report numbers of outcome events or summary measures</i>	NA	
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Yes	13-14
		(b) Report category boundaries when continuous variables were categorized	NA	
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	NA	
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	NA	
Discussion				
Key results	18	Summarise key results with reference to study objectives	Yes	15-17
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	Yes	17
Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	Yes	17-18
Generalisability	21	Discuss the generalisability (external validity) of the study results	Yes	17
Other information				
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	NA
