Appendix A

Follow up survey at the end of hypothesis-generation tasks

1. Can you tell us your basic demographics:
   a. Gender: Female, Male
   b. Age range: <=35, 36-45, 46-55, 56-65, 66-75, >=76
   c. Job title:
   d. Type of organization that you affiliate with:

2. How often do you need to use computers?
   a. Daily
      i. <=2 hours
      ii. >2 and <=4 hours
      iii. >4 hours
   b. Weekly
   c. Monthly
   d. Yearly

3. How many years of experience do you have in clinical research (including hypothesis generation and study design)?
   a. <=2 years
   b. >2 and <5 years
   c. >=5 and <10 years
   d. >= 10 years

4. How many years of experience do you have in data analysis during clinical research?
   a. <=2 years
   b. >2 and <5 years
   c. >=5 and <10 years
   d. >= 10 years

5. What type of role do you mainly play in clinical research (including hypothesis generation and study design)?
   a. Leading role
   b. Participating role
   c. Other, please specify______________

6. What type of role do you mainly play in data analysis during clinical research?
   a. Leading role
   b. Participating role
   c. Other, please specify______________
7. What data analysis tools do you usually use? Please check all that apply.
   a. Excel
   b. R
   c. SAS
   d. SPSS
   e. Other, please specify____________________

8. In a 0 (the least helpful) to 10 (the most helpful) scale, what would be your assessment of the following dimensions utilized in formulating your hypothesis:
   a. Basic, applied, translational research;
   b. observational or experimental study;
   c. descriptive or analytic research;
   d. comparison, association, or causal study;
   e. retrospective or prospective research;
   f. longitudinal or cross-sectional research
   g. qualitative or quantitative research
   h. single variable or multiple variables
   i. variables: dependent, independent, moderator, control, and intervening
   j. focused population
   k. one-tailed or two-tailed
   l. investigational intervention
   m. outcomes of interest

9. Can you give examples of the attributes or instructions that you think would be very helpful in formulating a hypothesis, however, are not provided during the study session?

10. Do you have any additional comments or suggestions about how to facilitate hypothesis generation?
