<b>MMP2</b>	0.3453867 ± 0.2258334	1.1536191 ± 0.4997104	0.145761 ± 0.0563883

Human Control Aorta, Abdominal Aortic Aneurysm (AAA), and Thoracic Aorta Aneurysm (TAA) samples were collected from the OR at Vanderbilt University Medical Center. Full informed consent was obtained for all tissue samples. RT-qPCR validation of RNAseq upregulated genes. Relative expression to GAPDH. TAA N=6, AAA N=4, Control N= 4, Data are presented as the mean + SD. P calculated with ANOVA. \*P<0.05.

**Supplemental Table 4. Relative expression to EIF1B2.**

Relative expression to EIF1B2			
Gene	Control	AAA	TAA
<b>SOX6</b>	$0.6691274 \pm 0.579481$	$18.7454412 \pm 8.5936152$	$1.8582904 \pm 0.7778931$
