27 * Additional information on Raw (Unadjusted) and Imputed Biomarker Measurements to accompany main text Table 2.

28 [†] **Abbreviations:** **CRP** C reactive protein; **ENRAGE** Extracellular newly identified receptor for advanced glycation end products
 29 binding protein; **GMCSF** granulocyte macrophage colony stimulating factor; **HMGB1** high mobility group box 1 protein; **ICAM1**
 30 intracellular adhesion molecule 1; **IFN γ** interferon γ ; **IL** interleukin; **MMP9** matrix metalloproteinase 9; **MPO** myeloperoxidase; **NE**
 31 neutrophil elastase; **PR3** proteinase 3; **sRAGE** soluble receptor for advanced glycation products; **SLPI** secretory leukoprotease
 32 inhibitor; **TARC** thymus and activation regulation chemokine; **TNF α** tumor necrosis factor α ; **YKL40** chitinase 3-like 1 protein; **SD**
 33 Standard Deviation; **CV** Coefficient of Variation.

34 [§] After log transformation, adjusted and imputed data for PR-3 were greater than raw data, *t*-test *p* = 0.001, both comparisons.
