Note. TLE = Temporal Lobe Epilepsy; TOPF = Test of Premorbid Functioning; WASI-II = Wechsler Abbreviated Scale of Intelligence, Second Edition; FSIQ = Full Scale Intelligence Quotient; WAIS-IV = Wechsler Adult Intelligence Scale, Fourth Edition; WMS-IV = Wechsler Memory Scale, Fourth Edition; RAVLT = Rey Auditory Verbal Learning Test; WMS-R = Wechsler Memory Scale-Revised; BNT = Boston Naming Test; TOT = Tip-of-the-tongue; OLR (COWAT) = Orthographic Lexical Retrieval (Controlled Oral Word Association Test); WFD = Word Finding Difficulty; VGT = Verb Generation Task; ANT = Auditory Naming Task; HADS = Hospital Anxiety and Depression Scale. Represented as z-scores where normative data was available, raw data are indicated by[^]. Latencies are expressed in seconds. Group differences computed using Mann-Whitney U test, effect sizes r, where * = p <.05, ** = p <.01. ^aSuggests that data does not violate assumptions of normality on Shapiro-Wilk.
