

	During the last 6 months				Physician's notes					
	Not present	Frequency 1 = sometimes 2 = about ½ of the time 3 = most of the time 4 = always		Severity 1 = mild 2 = moderate 3 = severe 4 = very severe						
23 Orientation problems	0	1	2	3	4	1	2	3	4	
24 Comprehension problems	0	1	2	3	4	1	2	3	4	
25 Word-finding problems	0	1	2	3	4	1	2	3	4	
26 If cognitive symptoms (V.20-25) are present, do they worsen due to effort / stress or time pressure?										Yes No
27 Perceptual and sensory disturbances, e.g., blurred vision	0	1	2	3	4	1	2	3	4	
28 Coordination problems	0	1	2	3	4	1	2	3	4	
29 Muscle twitches	0	1	2	3	4	1	2	3	4	
30 Muscle weakness	0	1	2	3	4	1	2	3	4	
31 Overload phenomena - hypersensitivity to (bright) light	0	1	2	3	4	1	2	3	4	
32 Overload phenomena - hypersensitivity to noise	0	1	2	3	4	1	2	3	4	
33 Overload phenomena - hypersensitivity to touch	0	1	2	3	4	1	2	3	4	
34 Overload phenomena – emotional overload	0	1	2	3	4	1	2	3	4	

VI Autonomic Manifestations										
35 Dizziness	0	1	2	3	4	1	2	3	4	
36 Palpitations with or without cardiac arrhythmias	0	1	2	3	4	1	2	3	4	
37 Circulatory problems when getting up	0	1	2	3	4	1	2	3	4	
38 Circulatory problems in an upright posture	0	1	2	3	4	1	2	3	4	
39 Unusual paleness	0	1	2	3	4	1	2	3	4	
40 Bladder problems	0	1	2	3	4	1	2	3	4	
41 Gastrointestinal problems	0	1	2	3	4	1	2	3	4	
42 Exertional shortness of breath	0	1	2	3	4	1	2	3	4	

VII Neuroendocrine Manifestations										
43 Loss of thermostatic stability (e.g., subnormal body temperature, and marked diurnal fluctuation, sweating episodes, feelings of feverishness, cold limbs)	0	1	2	3	4	1	2	3	4	
44 Intolerance of extremes hot and cold	0	1	2	3	4	1	2	3	4	
45 Marked weight change – loss of appetite or abnormal appetite	0	1	2	3	4	1	2	3	4	
46 Worsening of symptoms with stress	0	1	2	3	4	1	2	3	4	

VIII Immunologic Manifestations										
47 Flu like symptoms / general malaise	0	1	2	3	4	1	2	3	4	
48 Painful lymph nodes	0	1	2	3	4	1	2	3	4	
49 Recurrent sore throat	0	1	2	3	4	1	2	3	4	
50 New sensitivities to food, medication or chemicals	0	1	2	3	4	1	2	3	4	

Further Questions About the Symptom Course										
If there are any symptoms, what are the three main symptoms of this questionnaire?										
1.....										
2.....										
3.....										

For evaluation of this questionnaire please use the supplementary scoring sheet for adults.

**Munich Berlin Symptom Questionnaire (MBSQ) – Questionnaire for Pediatric and Adolescent Patients**

Surname:	Name (physician):
Name:	Date (physician):
Date of birth:	Institution:
Today's date:	Date of disease onset:
Completion time:      min	

*For patients:* Please complete this questionnaire on your own as far as possible. If necessary, ask your parents to help you.

*For doctors:* This questionnaire has to be used in **medical interview**. Open **questions** and comprehensive **problems** should be clarified in a **medical visit**. The medical **evaluation** of this questionnaire has to be based on the **supplementary scoring sheet for adults**. ME/CFS is a **clinical diagnosis**. The diagnosis cannot be established without appropriate **differential diagnostics**.

	During the last 3 months				Physician's notes					
	Is not present	Frequency 1 = sometimes 2 = about ½ of the time 3 = most of the time 4 = always				Severity 1 = mild 2 = moderate 3 = severe 4 = very severe				
<b>I Fatigue / Daily Function</b>										
1	0	1	2	3	4	1	2	3	4	
2	0	1	2	3	4	1	2	3	4	
3	0	1	2	3	4	1	2	3	4	
4	0	1	2	3	4	1	2	3	4	
5	If fatigue is present, did it start new or at a definable time?					Yes	No			
6	If fatigue is present, is it the result of ongoing, excessive exertion?					Yes	No			
7	If fatigue is present, is it alleviated by rest?					Yes	No			

<b>II Post-Exertional Symptoms</b>										
8	0	1	2	3	4	1	2	3	4	
9	0	1	2	3	4	1	2	3	4	
10	O ≤ 1 h		O 2-3 h		O 4-10 h					
	O 11-13 h		O 14-23 h		O ≥ 24 h					
11	If post-exertional symptoms are present, which three mild daily activities lead to a worsening of the symptoms?					1..... 2..... 3.....				
12	If post-exertional symptoms are present, which three symptoms worsen after mild daily activities?					1..... 2..... 3.....				

	During the last 3 months				Physician's notes					
	Not present	Frequency 1 = sometimes 2 = about ½ of the time 3 = most of the time 4 = always				Severity 1 = mild 2 = moderate 3 = severe 4 = very severe				
<b>III Sleep</b>										
13	0	1	2	3	4	1	2	3	4	
14	0	1	2	3	4	1	2	3	4	
15	0	1	2	3	4	1	2	3	4	
16	0	1	2	3	4	1	2	3	4	
17	0	1	2	3	4	1	2	3	4	

<b>IV Pain</b>										
18	0	1	2	3	4	1	2	3	4	
19	0	1	2	3	4	1	2	3	4	
20	0	1	2	3	4	1	2	3	4	
21	0	1	2	3	4	1	2	3	4	

	During the last 3 months				Physician's notes
	Not present	Frequency 1 = sometimes 2 = about ½ of the time 3 = most of the time 4 = always	Severity 1 = mild 2 = moderate 3 = severe 4 = very severe		
<b>V Neurocognitive Manifestations</b>					
22 Confusion	0	1 2 3 4	1 2 3 4		
23 Slowness of thought	0	1 2 3 4	1 2 3 4		
24 Concentration problems	0	1 2 3 4	1 2 3 4		
25 Memory problems	0	1 2 3 4	1 2 3 4		
26 Orientation problems	0	1 2 3 4	1 2 3 4		
27 Comprehension problems	0	1 2 3 4	1 2 3 4		
28 Word-finding problems	0	1 2 3 4	1 2 3 4		

29 If cognitive symptoms (V.23-28) are present, do they worsen due to Effort / stress or time pressure?	Yes	No	
---	-----	----	--

30 Absent mindedness	0	1 2 3 4	1 2 3 4	
31 Difficulty recalling information	0	1 2 3 4	1 2 3 4	
32 Need to focus on one thing at a time	0	1 2 3 4	1 2 3 4	
33 Trouble expressing thought	0	1 2 3 4	1 2 3 4	
34 Lose train of thought	0	1 2 3 4	1 2 3 4	
35 New troubles with math or other educational subjects	0	1 2 3 4	1 2 3 4	
36 Perceptual and sensory disturbances, e.g., blurred vision	0	1 2 3 4	1 2 3 4	
37 Coordination problems	0	1 2 3 4	1 2 3 4	
38 Muscle twitches	0	1 2 3 4	1 2 3 4	
39 Muscle weakness	0	1 2 3 4	1 2 3 4	
40 Overload phenomena - hypersensitivity to (bright) light	0	1 2 3 4	1 2 3 4	
41 Overload phenomena - hypersensitivity to noise	0	1 2 3 4	1 2 3 4	
42 Overload phenomena - hypersensitivity to touch	0	1 2 3 4	1 2 3 4	
43 Overload phenomena – emotional overload	0	1 2 3 4	1 2 3 4	

<b>VI Autonomic Manifestations</b>				
44 Dizziness	0	1 2 3 4	1 2 3 4	
45 Palpitations with or without cardiac arrhythmias	0	1 2 3 4	1 2 3 4	
46 Circulatory problems when getting up	0	1 2 3 4	1 2 3 4	
47 Circulatory problems in upright posture	0	1 2 3 4	1 2 3 4	
48 Unusual paleness	0	1 2 3 4	1 2 3 4	
49 Bladder problems	0	1 2 3 4	1 2 3 4	
50 Gastrointestinal problems	0	1 2 3 4	1 2 3 4	
51 Exertional shortness of breath	0	1 2 3 4	1 2 3 4	

<b>VII Neuroendocrine Manifestations</b>				
52 Loss of thermostatic stability (e.g., subnormal body temperature, and marked diurnal fluctuation, sweating episodes, feelings of feverishness, cold limbs)	0	1 2 3 4	1 2 3 4	
53 Intolerance of extremes hot and cold	0	1 2 3 4	1 2 3 4	
54 Marked weight change – loss of appetite or abnormal appetite	0	1 2 3 4	1 2 3 4	
55 Worsening of symptoms with stress	0	1 2 3 4	1 2 3 4	

<b>VIII Immunologic Manifestations</b>				
56 Flu like symptoms / general malaise	0	1 2 3 4	1 2 3 4	
57 Painful lymph nodes	0	1 2 3 4	1 2 3 4	
58 Fever	0	1 2 3 4	1 2 3 4	
59 Recurrent sore throat	0	1 2 3 4	1 2 3 4	
60 New sensitivities to food, medication or chemicals	0	1 2 3 4	1 2 3 4	

<b>Further Questions About the Symptom Course</b>	
If there are any symptoms, what are the three main symptoms of this questionnaire?	1..... 2..... 3.....

## Munich Berlin Symptom Questionnaire – Scoring Sheet for Adults (≥ 18 Years of Age)

Only if frequency and severity are reported with ≥2, the respective item counts positively for evaluation.

<sup>1</sup>Jason, Leonard & Jordan, Karen & Miike, Teruhisa & Bell, David & Lapp, Charles & Torres-Harding, Susan & Rowe, Kathy & Gurwitt, Alan & Meirleir, Kenny & Hoof, Elke & Psych, Clin & Chairperson,. (2006). A Pediatric Case Definition for Myalgic Encephalomyelitis and Chronic Fatigue Syndrome. Journal Of Chronic Fatigue Syndrome. 13. 1-44. 10.1300/J092v13n02\_01.

<sup>2</sup>Rowe, Peter & Underhill, Rosemary & Friedman, Kenneth & Gurwitt, Alan & Medow, Marvin & Schwartz, Malcolm & Speight, Nigel & Stewart, Julian & Vallings, Rosamund & Rowe, Katherine. (2017). Myalgic Encephalomyelitis/Chronic Fatigue Syndrome Diagnosis and Management in Young People: A Primer. Frontiers in Pediatrics. 5. 10.3389/fped.2017.00121.

\* In the original publication by Rowe et al.<sup>2</sup> a duration of at least 6 months is required for the diagnosis. If the duration of the disease is <6 months, it is only recommended to express an urgent suspicion. We recommend a diagnosis in children and adolescents after a duration of 3 months in order to provide symptom-oriented care at an early stage.

## Munich Berlin Symptom Questionnaire – Additional Scoring Sheet for Adolescents (12-17 Years)

Only if frequency and severity are reported with  $\geq 2$ , the respective item enters positively into the evaluation.
