

## ImageJ measurement instructions.

- Open ImageJ and go to "Plugins" → "Macros" → "Startup Macros".
- Add the following macros to the end of the page in the "Startup Macros" pop-up:

```
macro "MeasureMacroRectangle [f1]" {  
    setTool("Rectangle");  
    makeRectangle(669, 321, 250, 250);  
    waitForUser("Select the top dressing region, without changing the size of the rectangle, then  
    press OK");  
    run("Measure");  
    makeRectangle(669, 1041, 250, 250);  
    waitForUser("Select the bottom periwound region, without changing the size of the  
    rectangle, then press OK");  
    run("Measure");  
}
```

```
macro "MeasureMacroCircle [f2]" {  
    setTool("Oval");  
    makeOval(756, 435, 125, 125);  
    waitForUser("Select the top wound region, without changing the size of the circle, then  
    press OK");  
    run("Measure");  
    makeOval(750, 1176, 125, 125);  
    waitForUser("Select the bottom wound region, without changing the size of the circle, then  
    press OK");  
    run("Measure");  
}
```

```
macro "MeasureMacroCircleExtended [f3]" {  
    setTool("Oval");  
    makeOval(756, 435, 175, 175);  
    waitForUser("Select the top wound region, without changing the size of the circle, then  
    press OK");  
    run("Measure");
```

```
makeOval(750, 1176, 175, 175);  
  
waitForUser("Select the bottom wound region, without changing the size of the circle, then  
press OK");  
  
run("Measure");  
  
}
```

- Restart ImageJ.
- Go to “Analyze” → “Set Measurements” and make sure that the boxes named “Area fraction” and “Integrated density” are ticked.
- Go to “File” → “Import” → “Image sequence”. Choose the folder containing the binary Bactogram images that are to be analyzed.
- To analyze the square area, click f1. Follow the instructions in the prompt. Go to the next image in the image sequence and repeat.
- To analyze the wound area, click f2. Follow the instructions in the prompt. Go to the next image in the image sequence and repeat.
- To analyze the swabbed area, click f3. Follow the instructions in the prompt. Go to the next image in the image sequence and repeat.
