Note: *Denotes early medical cannabis law adopters; ^denotes late medical cannabis law adopters. Both were not included in the analysis. Law passage years were obtained from the National Conference of State Legislatures (<https://www.ncsl.org/health/state-medical-cannabis-laws>). Medical cannabis law effective dates were obtained from Anderson & Rees (2023).

Note: 2011 cohort consists of Arizona, 2012 cohort consists of NJ, 2013 consists of DC and MA, 2014 consists of CT, 2015 consists of DE, IL, and MN, 2016 consists of AR, FL, NH, and NY, 2017 consists of MD and WV, 2018 consists of OK and PA, 2019 consists of LA, ND, and OH, 2020 consists of MO, UT, and VA. Average weights = average from non-zero weights. As year passage and time was consistent across all models, the weighting provided here was also consistent.

Supplemental Table 5: The impact of medical cannabis law adoption on average total premium and deductible costs per employee translated into dollars, 2003-2022.

Note: Overall is the average of all post-treatment years for all medical cannabis law adopters; Last Five Years is the average of years 6 through 10 post-medical cannabis implementation. Never treated as the comparison cohort. Average \$ is equal to the states that passed medical cannabis laws in their post-treatment period. We then applied the effect size to find the effect in real dollars for the C-ATT and the 95% CI using the standard errors. * Denotes where effect has a p-value <0.05
