

Supplementary Table 1 | Heterogeneity statistics for baseline variables in GLP1 meta analysis (Model A).Heterogeneity across ancestries and studies for the tested genetic exposures. Cochran's Q (P-Value) and the I² statistics are reported in the table.

Baseline variable	Q coefficient	P-value	Q coefficient	I²				
Baseline weight	362.590534	3.40E-76	0.9862103					
Sex	29.251478	2.07E-05	0.8290685					
Age at baseline	2.660835	0.7521017	0					
<i>Studies with EUR ancestry only:</i>								
Baseline variable	Q coefficient	P-value	Q coefficient	I²				
Baseline weight	10.071329	0.1216802	0.4042494					
Sex	1.139853	0.9797513	0					
Age at baseline	5.177059	0.521313	0					

Supplementary Table 2 | Heterogeneity statistics for baseline variables in BS meta analysis (Model A).Heterogeneity across ancestries and studies for the tested genetic exposures. Cochran's Q (P-Value) and the I² statistics are reported in the table.

Baseline variable	Q coefficient	P-value Q coefficient	I2				
Baseline weight	72.8537968	1.04E-15	0.9588216				
Sex	0.5087383	0.9169675	0				
Age at baseline	0.6844168	0.8768630	0				
<i>Studies with EUR ancestry only:</i>							
Baseline variable	Q coefficient	P-value Q coefficient	I2				
Baseline weight	66.67497	1.96E-12	0.9100112				
Sex	22.10186	1.16E-03	0.7285296				
Age at baseline	7.784325	0.2543339	0.2292203				

Supplementary Table 3 | Polygenic score (PGS) - phenotype associations.

Associations between PGS and the respective phenotype for each ancestry. The table contains the R-squared (R2), N, Beta and P-val for the models.

The baseline model included age, sex and top 20 principal components as covariates. We included the following studies: UCLA-ATLAS Biobank (N= 33,253), Qatar Biobank (N=2,258)

In ATLAS, the association between PGS and the corresponding trait were tested in the entire biobank, while in Qatar Biobank only in individuals that were included in the analyses

rs728996	5.616315641	0.1318448264	0.4658419875						

Supplementary Table 11 | Bariatric surgery (BS) codes.

List and description of the procedures included in the BS analysis. Procedure, abbreviations, technique description and CPT-4 Codes are reported in the table.

Procedure	Abbreviation	Technique	CPT-4 Codes
Roux-en-Y gastric bypass	RYGB	Open Laparoscopic	43846, 43847 43644, 43645,
Sleeve gastrectomy	SG	Laparoscopic	43775, 43659
Adjustable gastric band	AGB	Laparoscopic	43843, S2082
Adjustable gastric band	AGB	Open	43770
Vertical banded gastroplasty	VBG	Open	43842
Biliopancreatic diversion with duodenal switch	BPD/DS	Open	43845
