

## Chasing the ghost of infection past: identifying thresholds of change during the COVID-19 infection in Spain

Luis Santamaría<sup>1</sup> & Joaquín Hortal<sup>2</sup>

### SUPPLEMENTARY INFORMATION

**Supplementary Table S1.** Timeline of the outbreak and management measures in Spain. Based on Ravelo & Jerving (2020) plus local sources. Lines in orange indicate periods during which the growth rate of the number of cases and/or deaths increased, or the data series showed a sudden jump in the values (indicated with a “j↑” in the acronyms of the two right columns). Lines in red indicate periods during which the growth rate of the number of cases and/or deaths decreased. BRinf = breaking points (estimated time of infection). BPdet = breaking points (time of detection or death). CS = number of cases in Spain. CM: number of cases in madrid. DS = number of deaths in Spain. DM = number of deaths in Madrid. ↑ and ↓ indicates, respectively, an increase and a decrease in the growth rate after the breaking point.

Date	Outbreak dynamics t	Key events & management measures	BP inf	BP det
