Supplementary Figure 1. Survey consent and eligibility breakdown. Respondent surveys that were completely empty (n=675) were removed from analysis. Completed responses include both partial and full surveys.

Table S1. Complete list of variables, questions and scales used in analysis

Variable	Question	Scale
Age	<i>In what year were you born? (age determined by subtracting birth year from 2020)</i>	Continuous
Household size	<i>How many people in the following age groups currently live in your household (household defined as those currently living within your household, including family and non-family members)?</i>	Number of people (0-7+) of household members in ages 0-17, 18-65, 65+
Children	<i>Whether respondent indicated any children in household size</i>	Binary
Gender	<i>Which of the following best describes your gender identity?</i>	Binary (Female=1, Male=0)*
Race (White)	<i>What is your race? Check all that apply.</i>	Binary (White=1, non-white=0)
Education	<i>What is the highest level of formal education that you have?</i>	Some high school=1; High school graduate=2; Some college=3; Associates degree/technical school/apprenticeship=4; Bachelor's degree=5; Postgraduate/professional degree=6
College	<i>Indication of a bachelor's degree, postgraduate/professional degree in education</i>	Binary (1=College, No College=0)
Income	<i>Which of the following best describes your household income range in 2019 before taxes?</i>	Less than \$12,999 per year= 1; \$13,000- \$24,999 per year=2; \$25,000-\$49,999 per year=3; \$50,000-\$74,999 per year =4 \$75,000- \$99,999 per year=5; \$100,000- \$124,99 per year=6; \$125,000-\$149,999=7; More than \$150,000 per year=8
Urban Met Area	<i>ZIP code, determination of ZIP code within metropolitan Burlington three county area (Chittenden, Franklin, Grand Isle)</i>	Binary (1=Urban, Rural=0)
Challenge Questions	<i>Since the coronavirus outbreak (March 8th), how often did these happen to your household?</i> Could not afford the amount or kind of food my household wanted to buy Could not find as much food as I wanted to buy (e.g. food not in store) Could not find the kinds of food my household prefers to eat Delivered food to a friend, neighbor, or family member Had challenges getting food through a food pantry	1=Never, 2=Sometimes, 3=Usually, 4=Always, Not Applicable

Had challenges getting food through a school food program
 Had challenges knowing where to find help for getting food
 Had to go to more places than usual in order to find the food my household wanted
 Had to stand "too close for safety" to other people, when getting food (less than six feet)

On a scale from 1 (not at all worried) to 6 (extremely worried), what is your level of worry for your household about the following as it relates to coronavirus.

Concern Questions

There will not be enough food in the store
 Food will become more expensive for my household
 Food will become unsafe
 My household will lose access to programs that provide free food or money for food
 My household will have a decrease in income and won't be able to afford enough food
 My household won't have enough food if we have to stay at home and can't go out at all

1= not at all worried, 6= extremely worried, not applicable

Which of the following strategies, if any, are you currently using or likely to use in the future during the coronavirus if your household has challenges affording food? Indicate both current use where applicable and future use.

Current and Future Coping Strategies

Accept food from friends or family
 Borrow money from friends or family
 Buy different, cheaper foods
 Buy food on credit
 Buy foods that don't go bad quickly (like pasta, beans, rice, canned foods)
 Get food from a food pantry or soup kitchen
 Sign up for or continue participation in a government program such as 3Squares VT or WIC or National School Lunch Program
 Stretch the food that I have by eating less

Yes=1, No=0 for current strategies;
 1=Very Unlikely, 2=Unlikely,
 3=Somewhat Unlikely, 4=Somewhat Likely, 5= Likely, 6= Very Likely for future strategies

Helpful Strategies

What, if anything, would make it easier for your household to meet its food needs during the coronavirus pandemic?

Access to public transit or rides
 Different hours in meal programs or stores

1=Not Helpful, 2=Somewhat Helpful, 3=Helpful, 4=Very Helpful, Not Applicable

Extra money to help pay for food or bills
Help with administrative problems (like applying for food assistance)
Increase benefits of existing food assistance programs (like SNAP or WIC)
Information about food assistance programs or food pantries
More (or different) food in stores
More trust in safety of food delivery
More trust in safety of going to stores
Support for the cost of food delivery

* Transgender, non-binary, and prefer to self described were not a significant portion of responses, and are reported in Table 1, but were not included in the statistical analysis because of the small sample size

Table S2. Comparison of survey population and Vermont Census estimated data.

Demographic Category	Demographic variable	Vermont 2018 ACS	
		estimate	Survey population
Population and Sex	Population over 18	506,631	3219
	Persons under 18 years, percent	18.90%	22.30%
	Persons 65 years and over, percent	18.20%	17.50%
	Female persons, percent	50.70%	79.40%
Race and Ethnicity	White alone, percent	94.30%	96.10%
	Black or African American alone, percent	1.30%	0.20%
	American Indian and Alaska Native alone, percent	0.30%	0.60%
	Asian alone, percent	1.70%	0.50%
	Two or more races, percent	1.90%	2.60%
	Hispanic or Latino, percent	1.90%	1.60%
	White alone, not Hispanic or Latino, percent	98.10%	98.40%
Formal Education	High school graduate (includes equivalency)	29.20%	9.10%
	Some college, no degree	17.60%	14.80%
	Associate's degree	8.50%	10.50%
	Bachelor's degree	22.10%	33.60%
	Graduate or professional degree	15.30%	31.70%
	High school graduate or higher	92.60%	99.60%
	Bachelor's degree or higher	37.30%	65.30%
Income	Income less than \$14,999	10.10%	6.0% (less than \$13k)
	Income \$15,000 to \$24,999	9.50%	11.9% (13 - \$25k)
	Income \$25,000 to \$49,999	22.10%	24.00%
	Income \$50,000 to \$74,999	18.80%	20.00%
	Income \$75,000 to \$99,999	14.00%	15.80%
	Income \$100,000 to \$149,999	15.30%	15.40%
	Income \$150,000 or more	10.10%	6.90%
	Median household income (dollars)	\$ 60,076	N/A
	Mean household income (dollars)	\$ 78,472	\$ 66,939

* All data from the American Community Survey 2018 5-year estimates

Table S3. Results of a two-sided t-test for difference in food insecurity rates.

Variable	n=	Mean	Std Error	Std. Dev.	95% Confidence Interval	
Food Insecure in Previous 12 months	3,086	0.183	0.007	0.387	0.170	0.197
Food Insecure Since COVID-19	3,028	0.244	0.008	0.430	0.229	0.259

p<0.001

Table S4. Prevalence of food insecurity among food insecure respondents since COVID-19 by USDA categorization

Aggregate score*	Consistently Food Insecure	Newly Food Insecure
2	15.67%	30.23%
3	16.31%	22.87%
4	10.09%	13.95%
5	15.88%	14.34%
6	42.06%	18.60%
Low Food Security	42.07%	67.05%
Very Low Food Security	57.94%	32.94%

* Classification of 2 or higher on the USDA scale ranging from 0 to 6 indicates food insecurity. Individuals with 2-4 classification are considered to have low food security, while individuals with scores ranging from 4-6 are considered to have very low food security

Table S5. Prevalence of challenges during COVID-19.

Situation	Food Secure		Newly Food Insecure		Consistently Food Insecure		P Value	
	Mean	95% CI	Mean	95% CI	Mean	95% CI	All Groups	New and Consistently Food Insecure
Could not afford the amount or kind of food my household wanted to buy	1.13	1.11-1.15	2.09	1.98-2.19	2.53	2.45-2.60	<0.001	<0.001
Could not find as much food as I wanted to buy (e.g. food not in store)	1.93	1.90-1.96	2.71	2.61-2.82	2.80	2.71-2.88	<0.001	0.210
Could not find the kinds of food my household prefers to eat	2.01	1.98-2.04	2.57	2.47-2.66	2.65	2.57-2.73	<0.001	0.22
Delivered food to a friend, neighbor, or family member	1.73	1.69-1.76	1.99	1.86-2.12	1.88	1.79-1.97	<0.001	0.27
Had challenges getting food through a food pantry	1.13	1.08-1.18	1.78	1.51-2.05	2.23	2.07-2.38	<0.001	0.004
Had challenges getting food through a school food program	1.08	1.05-1.12	1.31	1.14-1.49	1.47	1.33-1.60	<0.001	0.06
Had challenges knowing where to find help for getting food	1.18	1.15-1.20	1.68	1.55-1.80	2.01	1.91-2.12	<0.001	<0.001
Had to go to more places than usual in order to find the food my household wanted	1.90	1.86-1.93	2.62	2.50-2.74	2.72	2.63-2.82	<0.001	0.18
Had to stand "too close for safety" to other people, when getting food (less than six feet)	1.98	1.95-2.02	2.39	2.27-2.51	2.47	2.38-2.56	<0.001	0.29

P values among all groups conducted using Kruskal Wallis Test. P values among new and consistently food insecure conducted using Wilcoxon Rank Sum tests with P order Exact P values

Table S6. Average level of concern for food access among three groups

Question	Food Secure		Newly Food Insecure		Consistently Food Insecure		P Value	
	Mean	95% CI	Mean	95% CI	Mean	95% CI	All Groups	New and Consistently Food Insecure
There will not be enough food in the store	2.95	2.89-3.01	4.06	3.88-4.24	4.36	4.23-4.49	<0.001	0.005
Food will become more expensive for my household	3.23	3.16- 3.29	4.75	4.59-4.90	5.24	5.14-5.34	<0.001	<0.001
Food will become unsafe	3.01	2.95-3.08	4.15	3.95-4.35	4.15	4.00-4.30	<0.001	0.98
My household will lose access to programs that provide free food or money for food	1.71	1.61- 1.82	3.25	2.92-3.58	4.37	4.17-4.57	<0.001	<0.001
My household will have a decrease in income and won't be able to afford enough food	2.58	2.51- 2.65	4.61	4.42-4.80	4.98	4.84-5.11	<0.001	0.001
My household won't have enough food if we have to stay at home and can't go out at all	3.02	2.95- 3.09	4.66	4.47-4.84	4.90	4.76-5.03	<0.001	0.02

P values among all groups conducted using Kruskal Wallis Test. P values among new and consistently food insecure conducted using Wilcoxon Rank Sum tests with Porder Exact P values.

Table S7. Use of current coping strategies to increase food access during COVID-19.

Strategy	Food Secure		Newly Food Insecure		Consistently Food Insecure		P Value	
	Mean	95% CI	Mean	95% CI	Mean	95% CI	All Groups	New and Consistently Food Insecure
Accept food from friends or family	0.18	0.16-0.20	0.35	0.29-0.42	0.43	0.38-0.48	<0.001	0.06
Borrow money from friends or family	0.03	0.03-0.04	0.15	0.10-0.20	0.24	0.19-0.28	<0.001	0.01
Buy different, cheaper foods	0.29	0.27--0.31	0.65	0.59-0.71	0.66	0.62-0.71	<0.001	0.80
Buy food on credit	0.12	0.10-0.13	0.25	0.19-0.30	0.27	0.23-0.32	<0.001	0.53
Buy foods that don't go bad quickly (like pasta, beans, rice, canned foods)	0.62	0.60-0.64	0.78	0.72-0.83	0.76	0.72-0.80	<0.001	0.62
Get food from a food pantry or soup kitchen	0.02	0.02-0.03	0.09	0.06-0.13	0.27	0.23-0.31	<0.001	<0.001
Sign up for or continue participation in a government program such as 3Squares VT or WIC or National School Lunch Program	0.08	0.07-0.09	0.29	0.23-0.35	0.41	0.36-0.45	<0.001	0.004
Stretch the food that I have by eating less	0.16	0.14-0.17	0.65	0.59-0.71	0.68	0.64-0.73	<0.001	0.41

P values among all groups conducted using Kruskal Wallis Test. P values among new and consistently food insecure conducted using Wilcoxon Rank Sum tests with Porder Exact P values

Table S8. Use of food assistance programs during COVID-19 among households experiencing food insecurity

Program	Newly Food Insecure		Consistently Food Insecure		P Value
	Mean	95% CI	Mean	95% CI	
Meals on Wheels	0.01	0.00-0.02	0.02	0.01-0.04	1.00
SNAP	0.13	0.09-0.17	0.27	0.23-0.31	<0.001
WIC	0.10	0.07-0.14	0.12	0.09-0.15	0.74
Food Pantry	0.08	0.05-0.11	0.21	0.17-0.25	<0.001

P values determined using Wilcoxon Rank Sum with Porder Exact P Values

Table S9. Likely use of future coping strategies for food access during COVID-19.

Strategy	Food Secure		Newly Food Insecure		Consistently Food Insecure		P Value	
	Mean	95% CI	Mean	95% CI	Mean	95% CI	All Groups	New and Consistently Food Insecure
Accept food from friends or family	2.76	2.69-2.83	3.47	3.26-3.67	3.69	3.53-3.86	<0.001	0.06
Borrow money from friends or family	1.97	1.91-2.03	2.81	2.60-3.02	2.78	2.60-2.95	<0.001	0.50
Buy different, cheaper foods	3.80	3.72-3.87	4.83	4.67-4.99	4.87	4.73-5.01	<0.001	0.21
Buy food on credit	2.45	2.37-2.52	3.16	2.92-3.40	3.11	2.91-3.31	<0.001	0.58
Buy foods that don't go bad quickly (like pasta, beans, rice, canned foods)	4.90	4.84-4.96	5.20	5.05-5.34	5.19	5.07-5.32	<0.001	0.47
Get food from a food pantry or soup kitchen	1.76	1.81-1.82	2.83	2.62-3.03	3.58	3.40-3.77	<0.001	<0.001
Sign up for or continue participation in a government program such as 3Squares VT or WIC or National School Lunch Program	1.91	1.84-1.98	3.24	2.97-3.50	4.08	3.88-4.28	<0.001	<0.001
Stretch the food that I have by eating less	3.00	2.93-3.07	4.69	4.51-4.86	4.93	4.81-5.06	<0.001	0.007

P values among all groups conducted using Kruskal Wallis Test. P values among new and consistently food insecure conducted using Wilcoxon Rank Sum tests with P order Exact P values

Table S10. Perceived helpful strategies to assist households with meeting food needs during COVID-19.

Strategy	Food Secure		Newly Food Insecure		Consistently Food Insecure		P Value	
	Mean	95% CI	Mean	95% CI	Mean	95% CI	All Groups	New and Consistently Food Insecure
Access to public transit or rides	1.20	1.16-1.24	1.23	1.11-1.36	1.81	1.65-1.97	<0.001	<0.001
Different hours in meal programs or stores	1.79	1.73-1.85	2.03	1.87-2.20	2.24	2.11-2.37	<0.001	0.06
Extra money to help pay for food or bills	2.35	2.29-2.42	3.32	3.20-3.44	3.69	3.63-3.75	<0.001	<0.001
Help with administrative problems (like applying for food assistance)	1.41	1.35-1.48	2.17	1.96-2.39	2.58	2.44-2.73	<0.001	0.001
Increase benefits of existing food assistance programs (like SNAP or WIC)	1.81	1.72-1.90	2.91	2.70-3.11	3.51	3.41-3.61	<0.001	<0.001
Information about food assistance programs or food pantries	1.61	1.54-1.69	2.35	2.16-2.54	2.77	2.65-2.89	<0.001	<0.001
More (or different) food in stores	2.77	2.73-2.82	3.21	3.10-3.32	3.27	3.18-3.36	<0.001	0.22
More trust in safety of food delivery	2.79	2.73-2.84	3.14	3.00-3.27	3.20	3.10-3.31	<0.001	0.35
More trust in safety of going to stores	3.23	3.19-3.27	3.54	3.44-3.63	3.48	3.40-3.56	<0.001	0.63
Support for the cost of food delivery	2.33	2.27-2.40	3.10	2.96-3.24	3.25	3.14-3.35	<0.001	0.03

P values among all groups conducted using Kruskal Wallis Test. P values among new and consistently food insecure conducted using Wilcoxon Rank Sum tests with Porder Exact P values.
