

Supplementary figure 1: Median interval Citation Gain (iCG) related to the country of the leading institute of the study

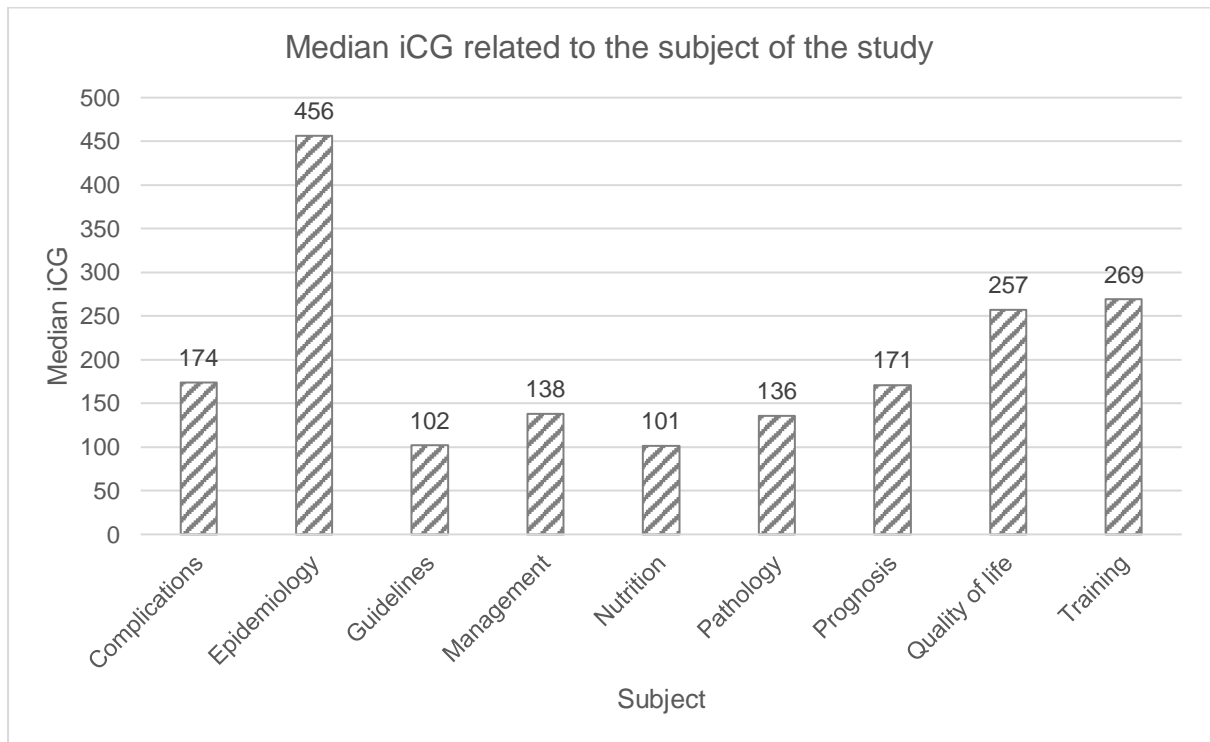

Supplementary figure 2: Median interval Citation Gain (iCG) related to the Oxford Centre for Evidence Based Medicine (OCEBM) level

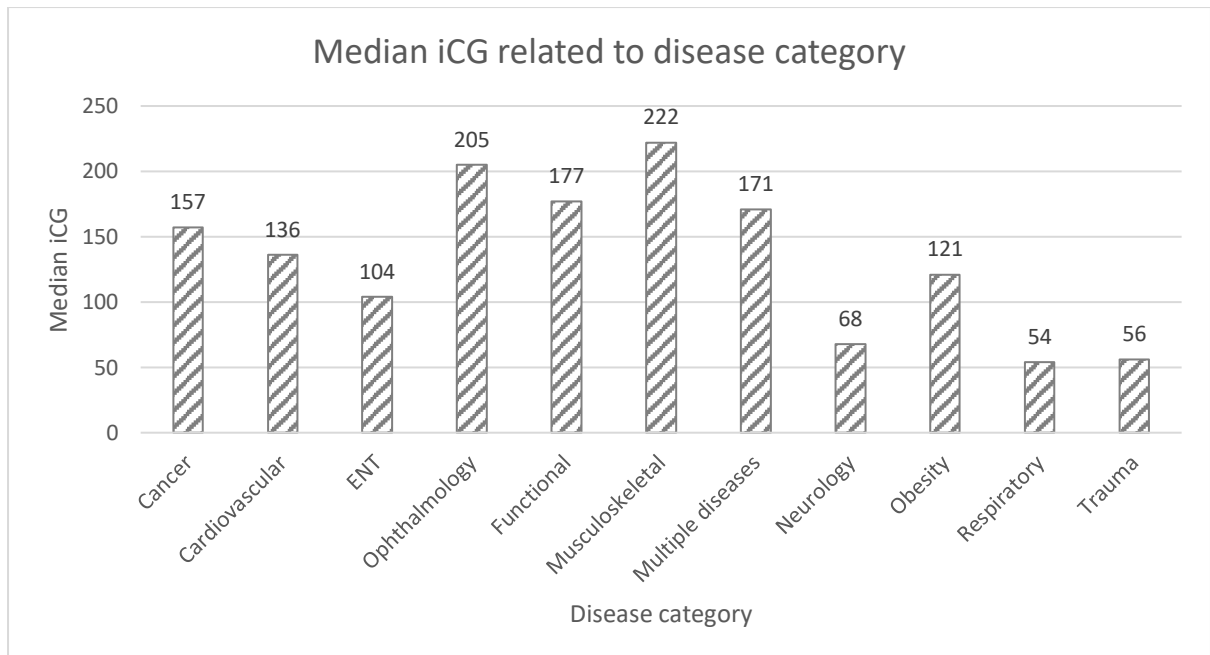

Supplementary figure 2: Four studies were omitted as they were training based and therefore did not fit into any of the evidence categories.

Supplementary figure 3: Median interval Citation Gain (iCG) related to the subject of the study

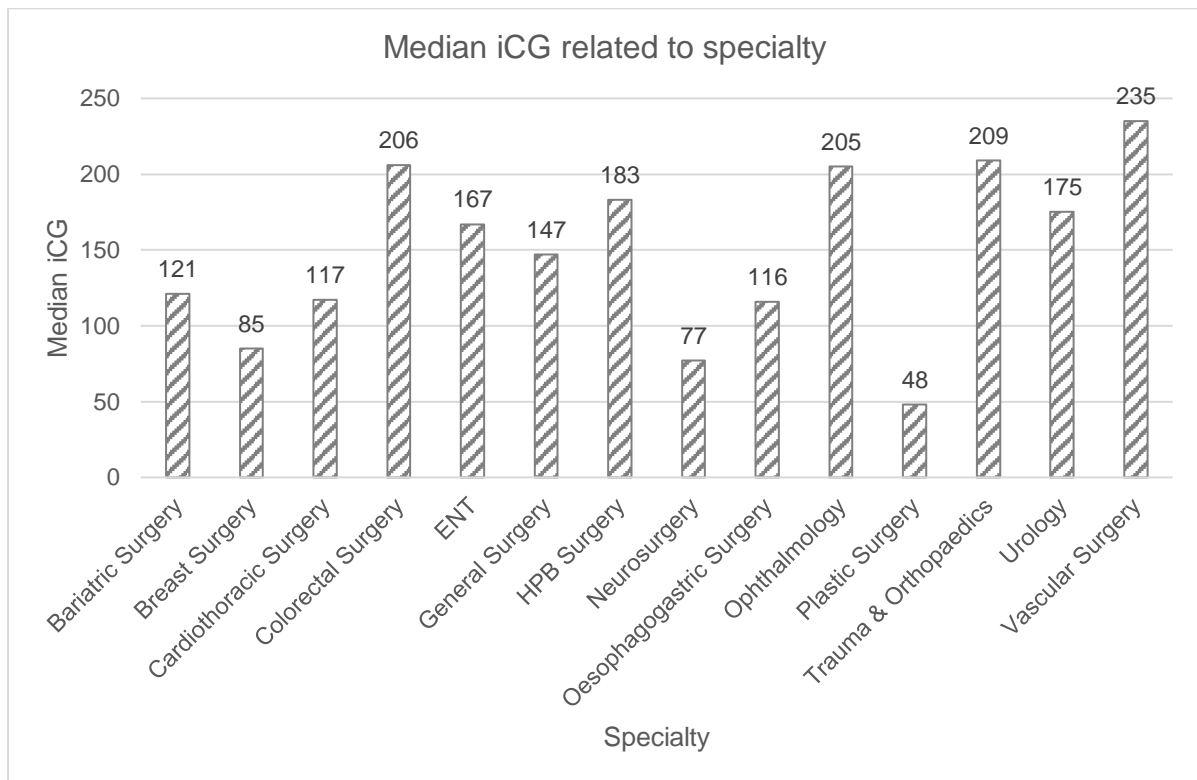

Supplementary figure 4: Median interval Citation Gain (iCG) related to disease category

Supplementary figure 4: Four studies were omitted as they were training based studies and therefore do not cover diseases.

Supplementary figure 5: Median interval Citation Gain (iCG) related to specialty

Supplementary figure 4: Seven studies were omitted as they were either applicable to multiple surgical specialities or were not speciality specific
