Prediction Legend

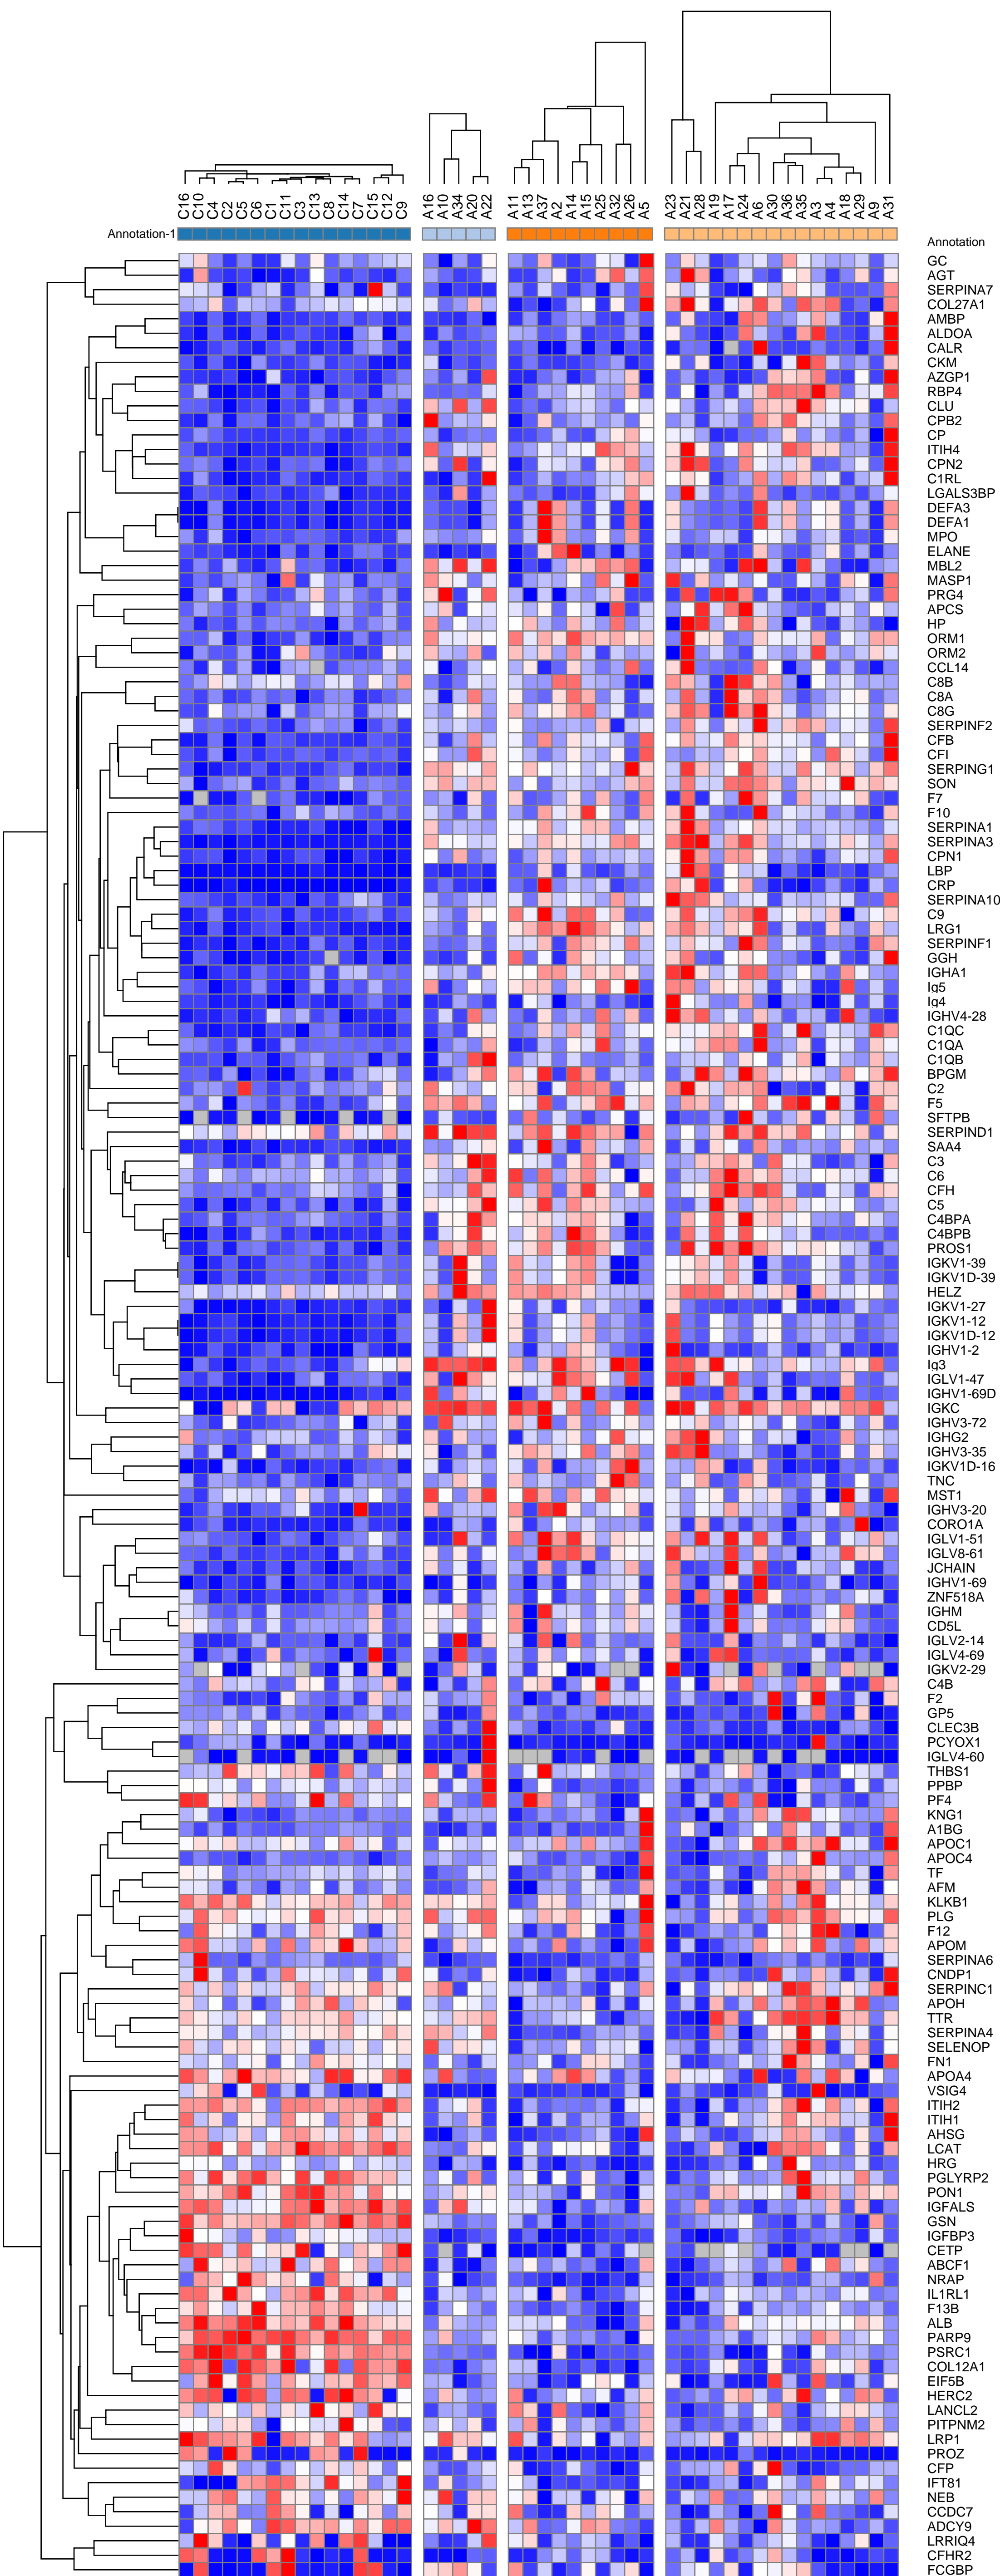

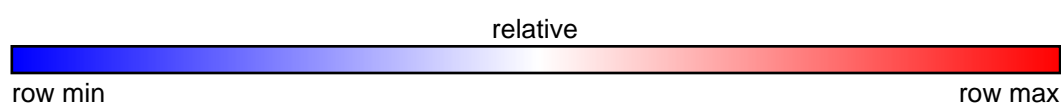

- more extreme in dataset: Increased measurement (red circle), Decreased measurement (green circle)
- more confidence: Predicted activation (orange circle), Predicted inhibition (blue circle)
- Glow indicates activity when opposite of measurement: Red glow (activation), Green glow (inhibition)
- Predicted Relationships: Leads to activation (orange arrow), Leads to inhibition (blue arrow), Findings inconsistent with state of downstream molecule (yellow arrow), Effect not predicted (grey arrow)

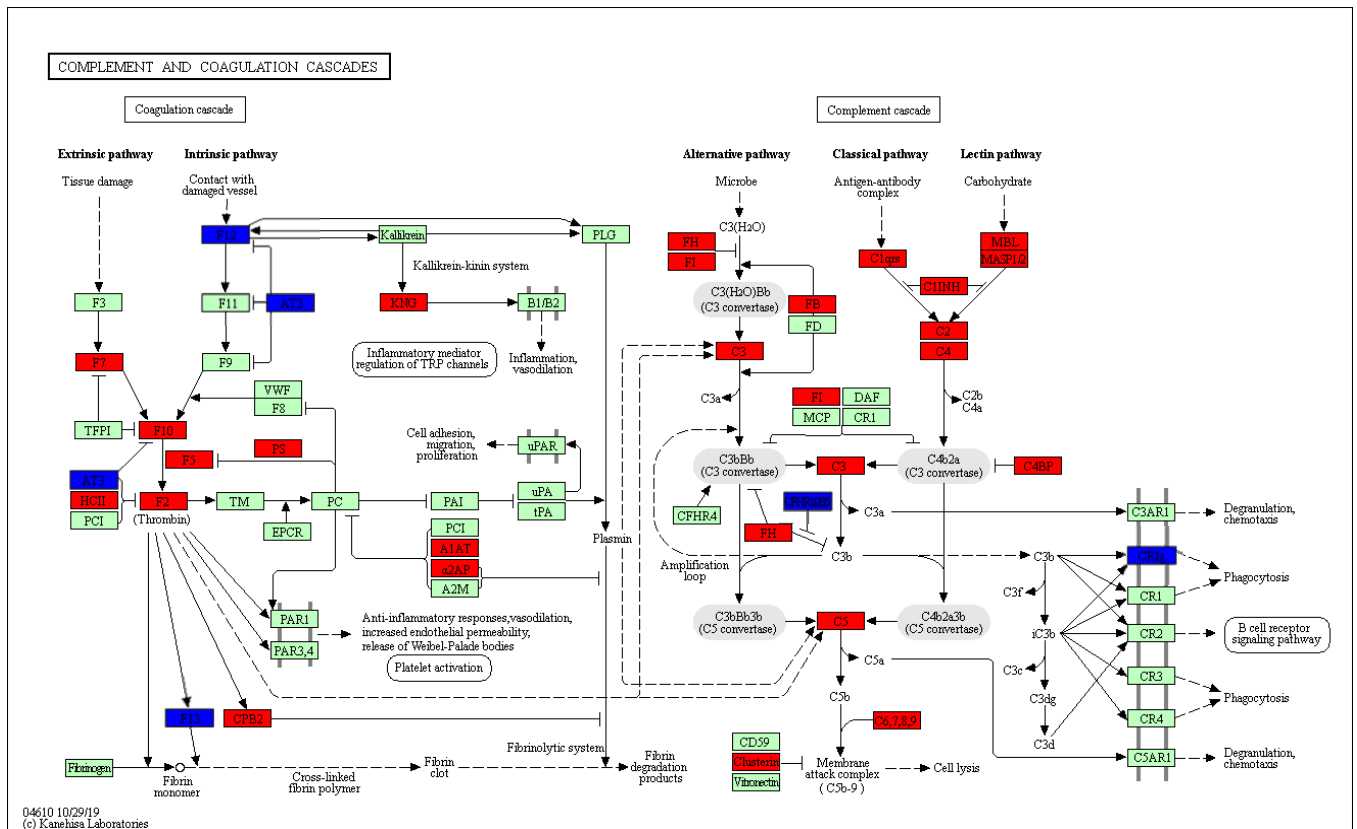

Supplementary Figure 1 – Unsupervised Ingenuity Pathway Analysis of the data highlight a significant impact of IL-6-dependent regulation on protein targets in COVID-19 patients

Annotation-1
 01-Control
 02-COVID+ Low IL6
 03-COVID+ Medium IL6
 04-COVID+ High IL6
