The IRB determined that the proposed activity is not research involving human subjects as defined by DHHS and FDA regulations.

This determination is based on the definition of “research” found at 45 CFR 46.102(l), which states:

*(l) Research* means a systematic investigation, including research development, testing, and evaluation, designed to develop or contribute to generalizable knowledge. Activities that meet this definition constitute research for purposes of this policy, whether or not they are conducted or supported under a program that is considered research for other purposes.

Based on the description you provided, this project is not designed to develop or contribute to generalizable knowledge.

IRB review and approval by this organization is not required. This determination applies only to the activities described in the IRB submission and does not apply should any changes be made. If changes are made and there are questions about whether these activities are research involving human in which the organization is engaged, please submit a study modification to the IRB for a determination.

For further information please refer to the [Investigator Manual \(HRP-103\)](#).
