Supplementary material

Figure S1. Countries which went into national lockdown with lower number of deaths from COVID-19 have lower total deaths over population (A); less days with deaths (B); and lower excess mortality (C) (from December 31, 2019 to June 11, 2020).
**Figure S2.** The Gender Inequality Index negatively correlates with social performance (A); more gender equal societies are happier (B) and more generous (C).
Figure S3. The Gender Inequality Index negatively correlate with the Basic Human Needs dimension of the Social Performance Index.
