

# Supplemental Tables

Room	Days between admission and sampling	Days between first COVID-19 positive and sampling	Days between most recent COVID-19 positive and sampling	Notes
Room 7A	24	24	1	
Room 7B	7	>10	0 (same day)	transfer from other facility
Room 5A	3	3	3	
Room 5B	2	2	2	
Room 5C	4	3,2	3,2	2 patients in this room
Room 5D	6	6	6	

**Table S1.** Metadata for rooms sampled in this study.

<b>PCR Reaction Mix</b>	
Nuclease Free Water	6.1 µL
Invitrogen 2X Master Mix	12.5 µL
MgSO4 (50mM)	0.4 µl
Primer/Probe Mix (IDT)* (Primers 10uM, Probe 5uM)	0.5 µl
SuperScript III Platinum Taq	0.5 µl
extracted sample RNA, nuclease free water or positive control	5.0 µL
<b>*E gene target primers and probe:</b>	
5'/56-FAM/ACACTAAGCC/ZEN/ATCCTTACTGCGCTTCG/3AIBkFG/-3'	Probe
5'-ATATTGCAGCAGTACGCACACA-3'	Primer 1
5'-ACAGGTACGTTAATAGTTAATAGCGT-3'	Primer 2

**Table S2.** PCR Reaction Mix used for all PCR of SARS-CoV-2 throughout the study.

<b>Process</b>	<b>Reagents</b>	<b>Conditions</b>
<b>Fixing</b>	<b>2% paraformaldehyde in 0.1M Sorenson's phosphate buffer (pH 7.2)</b>	<b>24 hours at 4 °C</b>
<b>Washing</b>	<b>0.1M Sorenson's phosphate buffer (pH 7.2)</b>	<b>3 times</b>
<b>Post Fix</b>	<b>1% aqueous solution of osmium tetroxide</b>	<b>30 minutes</b>
<b>Dehydration series</b>	<b>50,70, 90, 95 and 100% ethanol</b>	
<b>Embedding</b>	<b>50:50 Embed 812 Resin and propylene oxide</b>	<b>Overnight</b>
<b>Final Embedding</b>	<b>Fresh Embed 812 Resin</b>	<b>2 hours at room temperature followed by polymerization at 65 °C for 24 hours</b>
<b>Sectioning</b>	<b>100 nm sections stained with 2% Uranyl Acetate followed by Reynolds Lead Citrate</b>	<b>Cut with Leica UC6 Ultracut ultramicrotome</b>

**Table S3.** Sample preparation for transmission electron microscopy.

Room	Sample Type	Airborne Viral Concentration TCID50/cm <sup>3</sup> of Air	Standard Deviation	Day 1 TCID50/mL	Day 1 Standard Deviation	Final Day TCID50/mL	Final Day Standard Deviation	Percent Increase in TCID50/mL in Cell Culture	Significance of Calculated Increase (P- value)
Room 7A	BC251 <1 µm	5.50	4.98	0.07	0.04	0.08	0.05	23.78	0.32
Room 7A	BC251 1-4 µm	0.45	0.50	0.04	0.00	0.08	0.03	87.49	0.08
Room 7A	BC251 4.1 µm	1.57	1.48	0.05	0.02	0.10	0.07	81.17	0.24
Room 7B	BC251 <1 µm	5.94	6.79	0.07	0.02	0.10	0.04	44.57	0.03

	Room 7B	4.00E-01	3.76E-02	2.65E-04	3.54E-02
>4.1 µm	Room 5A	1.34E+00	4.59E-02	1.03E-23	3.72E-02
	Room 5B	1.57E+00	1.58E-02	1.39E-32	1.29E-02
	Room 5C	1.97E+00	3.03E-02	9.44E-15	2.86E-02
	Room 5D	4.00E+00	3.13E-02	6.93E-16	2.80E-02
	Room 7A	1.67E+00	1.29E-02	9.29E-17	1.08E-02
	Room 7B	2.74E+00	3.13E-02	6.93E-16	2.80E-02

**Table S6.** RT-PCR derived virus concentration and recovered mass concentrations for each stage of the BC251 sampler in each room included in this study.

SARS-CoV-2 Detected in Aerosol by PCR and Cell Culture		
	rRT-PCR	Cell Culture
>4.1 $\mu\text{m}$	6:6 (100%)	0:6 (0%)
1-4 $\mu\text{m}$	6:6 (100%)	2:6 (33%)*
< 1 $\mu\text{m}$	6:6 (100%)	3:6 (50%)

**Table S7.** Number and percentage of aerosol samples where SARS-CoV-2 was detected by rRT-PCR and where replication was observed in cell culture. Samples from the 1-4  $\mu\text{m}$  stage did reach the level of statistical significance ( $0.05 < P < 0.10$ ).
