

Supplementary Information file 1 Extraction form

Demo-graphics	1	Unique study number	
	2	year	
	3	Week of medical	
	4	Age in completed months	
	5	School status	Less than mandatory school age/reception – year 6/ year7-11/sixth form - college
	6	Special school	Yes/No
	7	Sex	Male/female
	8	Where does child normally live?	Birth parents/Special Guardian or kinship care/Foster care/Residential home or school/other
Referral details	9	Index case or referred as sibling/household group for CP medicals (including sibling inpatient with NAI)	Index case/sibling or household group
	10	Who is the allegation against?	Family or household contacts/professionals
	11	Source of initial disclosure of potential safeguarding incident (who did child first tell OR who first saw injury)	School or Early Years staff/social care staff /police/family member/ foster carer/medical professional /sibling NAI inpatient/other please state
Social care history	12	Was child referred to social care prior to needing this child protection medical?	Yes/No
	13	If yes: Current social care status at time that concerns were raised which led to this medical.	Investigation in progress/support from Family support worker /Child in Need/Child Protection Plan/ Child disability team/referred but NFA/other – please state
	14	Has child ever been on Child Protection Plan?	Yes/No
Outcomes	15	Are there any physical findings to support NAI or neglect?	Yes/No
	16	If yes: Physical Findings (can choose more than one, exclude accidental injuries)	Bruise/Burn /Abrasion/ Scar /implement mark/ human bite mark/laceration/neglect/Other/
	17	Likelihood of non-accidental injury (NAI)	Injury consistent with NAI/ injury not consistent with NAI or no injury seen
	18	If consistent with NAI: Extent of non-accidental injuries Are there NAI on more than one part of the body?	Yes/No
	19	If consistent with NAI: Are there injuries consistent with previous NAI?	Yes/No
	20	Based on all the evidence in the report does the report indicate significant safeguarding concerns?	Yes/No <i>If No STOP HERE</i>

	21	Are these concerns related to other factors than NAI?	Yes/No
	22	What are the significant safeguarding concerns? (can choose more than one)	Physical abuse/emotional abuse/ domestic violence/neglect/sexual abuse/child exploitation

Supplementary Table 2 Full details of demographics, referrals, social care history and outcomes.

	All	2018	2019	2020	p
<b>Sample N</b>	200	78	75	47	
<b>Age in months Median (IQR)</b>	69 (85)	72.5 (76)	70 (109)	55 (77)	.598

STROBE Statement—checklist of items that should be included in reports of observational studies

	<b>Item No</b>	<b>Recommendation</b>	<b>Page No</b>
<b>Title and abstract</b>	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	3
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	3
<b>Introduction</b>			

Background/rationale	2	Explain the scientific background and rationale for the investigation being reported	4-5
Objectives	3	State specific objectives, including any prespecified hypotheses	5
<b>Methods</b>			
Study design	4	Present key elements of study design early in the paper	5
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	5
Participants	6	(a) <i>Cohort study</i> —Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up  <i>Case-control study</i> —Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls  <i>Cross-sectional study</i> —Give the eligibility criteria, and the sources and methods of selection of participants	5
		(b) <i>Cohort study</i> —For matched studies, give matching criteria and number of exposed and unexposed  <i>Case-control study</i> —For matched studies, give matching criteria and the number of controls per case	n/a
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	5-6
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	5  <i>Figures 1 &amp; 2, Table 1</i>
Bias	9	Describe any efforts to address potential sources of bias	6
Study size	10	Explain how the study size was arrived at	6
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	5-6
Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	6
		(b) Describe any methods used to examine subgroups and interactions	6
		(c) Explain how missing data were addressed	n/a

<p><i>(d) Cohort study</i>—If applicable, explain how loss to follow-up was addressed</p> <p><i>Case-control study</i>—If applicable, explain how matching of cases and controls was addressed</p> <p><i>Cross-sectional study</i>—If applicable, describe analytical methods taking account of sampling strategy</p>	n/a
<i>(e)</i> Describe any sensitivity analyses	n/a

## Results

Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	7
		(b) Give reasons for non-participation at each stage	
		(c) Consider use of a flow diagram	
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	8
		(b) Indicate number of participants with missing data for each variable of interest	8
		(c) <i>Cohort study</i> —Summarise follow-up time (eg, average and total amount)	n/a
Outcome data	15*	<i>Cohort study</i> —Report numbers of outcome events or summary measures over time	n/a
		<i>Case-control study</i> —Report numbers in each exposure category, or summary measures of exposure	n/a
		<i>Cross-sectional study</i> —Report numbers of outcome events or summary measures	7-8 Table 1
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	8-9
		(b) Report category boundaries when continuous variables were categorized	
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	n/a

## Discussion

Key results	18	Summarise key results with reference to study objectives	8
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	8-9
Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	9-10
Generalisability	21	Discuss the generalisability (external validity) of the study results	9-10

## Other information

---

Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	12
