Study ID:_____
Study visit date:_____

Instructions: Participants should respond to all questions. Shaded areas should be taken from the patient available medical chart data.

MEDICAL HISTORY			
Q		**Response**	
1	Date of diagnosis Type 2 Diabetes (year)		**YYYY**
2	Does the participant take medical therapy for their diabetes?	**O** Y **O** N	
3	Date Type 2 Diabetes medical therapy initiated (year)		**YYYY**
4	Does the participant have a diagnosis of hypertensions?	**O** Y **O** N	
5	Date of diagnosis for hypertension (year)		**YYYY**
6	Does the participant take hypertensive medication?	**O** Y **O** N	
7	Date hypertensive medical therapy initiated (year)		**YYYY**
8	Does the patient have diabetic retinopathy? **From available medical chart data (If no DR diagnosis is >14 months then record as unknown)**	**O** Y **O** N **O** Unknown	
9	Grade of diabetic retinopathy: **From available medical chart data (If DR grade is >14 months record as unknown unless they have documented previous treatment for proliferative DR)**	**1** No DR **2** Non-proliferative DR (including background/ microaneurysms only) **3** Proliferative DR **4** Previous Treatment for proliferative DR **5** Unknown	
10	Does the patient have maculopathy? **From available medical chart data** To be taken from clinical data if available. If data is > 14 monthss: • Class no macular oedema as "Unknown" • If "Documented macular oedema" (DMO) or previous treatment for DMO then class as 2 and 3, respectively	**1** No macular edema **2** Documented macular edema **3** Previous treatment for macular edema **4** Unknown	
11	Does the patient have diabetic neuropathy? **From available medical chart data** To be defined on monofilaments if data available. In patients with no neuropathy and no available data within last 14 months, document as "Unknown"	**O** Y **O** N **O** Unknown	
12	If yes, is the diabetic neuropathy painful?	**O** Y **O** N	
13	Does the patient have heart failure stage II or IV?	**O** Y **O** N **O** Unknown	
14	Does the patient have any macrovascular diseases? (If yes then progress to questions 15, 16 & 17)	**O** Y **O** N	

15	Does the patient have history or evidence of coronary artery disease (check all that apply):	☐ Myocardial infarction ☐ Angina ☐ Angioplasty ☐ Stent ☐ CABG	
16	If yes to history or evidence of coronary artery disease, is there evidence or history of peripheral artery disease?	**O** Y **O** N	
17	Does the patient have any history or evidence of cerebrovascular disease? (Ischemic stroke and TIA confirmed by specialist (excluding TIA not confirmed by specialist, hemorrhagic stroke, and stroke associated with blood disease, tumors, trauma or surgical procedures))	**O** Y **O** N	
18	Does the patient have a history of malignancy?	**O** Y **O** N	
19	When? (year)		**YYYY**
SOCIAL HISTORY			
20	Current or previous tobacco use? (check all that apply)	☐ Cigarettes ☐ Pipe ☐ Cigars, cigarillos, or little cigars ☐ E-cigs ☐ Smokeless tobacco ☐ Never used tobacco	
21	If current or previous smoker, number of cigarettes smoked a day:		
22	If current or previous smoker, number of years smoking:		
23	If previous tobacco user, number of years tobacco-free:		
FAMILY HISTORY			
24	Does patient have a family history of renal disease?	**O** Y **O** N **O** Unknown	
25	Does patient have a family history of hypertension?	**O** Y **O** N **O** Unknown	
26	Does patient have a family history of Type 2 diabetes?	**O** Y **O** N **O** Unknown	
27	Does patient have a family history of cardiovascular disease?	**O** Y **O** N **O** Unknown	
28	Does patient have a family history of malignancy?	**O** Y **O** N **O** Unknown
