15-10-2019 15:03	idah_mokhele	Updated Record AMBIT2118	a25_additionalcomments = 'N/A', ambit_stakeholder_interview_complete = '1'

15-10-2019 15:02	idah_mokhele	Updated Record AMBIT2118	<p>p1_q30_enrolldef = 'Enrolled is defined as registered in the program and has an active script (6-month) in the CDU system. Medipost also uses a prompt-to-dispense system where a collection prompts the next dispensing and delivery. If there's no collection after the 10-day leeway period allowed after schedule collection date, the system automatically deactivates the patients from the program until they are re-engaged through the facility again with a new script.'</p> <p>p1_q37_database = 'Medipost has its own electronic data management system capturing patient-level data, dispensing data, parcel collection, defaulted patients, active patients, active scripts. To request access to program data from WCGH and City of Cape Town'</p> <p>p1_q41_datacollected = 'They collect patient-level data, dispensing data, parcel collection, defaulted patients, active patients, active scripts, short supply of stock, rejected scripts, facilities with allocate caps (limits in number of patients) reached. To request access to program data from WCGH and City of Cape Town'</p> <p>p1_q42_datafreq = 'Daily, as they dispense and deliver. Patients collect medication every two months.'</p> <p>p1_q57_comments = 'Medipost currently has a 5-year contract for CDU which started on 1 May 2018 which can be extended by 1 year. The contract has a standard 1 year handover period over to a new service provider.'</p> <p>CDU "caps" the number of patients that can be enrolled in the program per district/sub-district and facility. This is mostly defined by available budget, and population needs (i.e. clinic size). Medipost needs to track enrollment so that the caps are not exceeded. There is an opportunity for facilities to motivate for caps to be increased, but thi would also be depended on whether the budget allows.</p> <p>,</p> <p>a16_future = 'There's a drive from Project last mile/Maggie Moonsamy to get CCMDD into the WC - to establish more external pick-up points in the WC. Medipost doesn't have details of what that would look like, but they've been approached to participate. They imagine that it would be difficult as one CCMDD is a national program and the other CDU is a provincial program. They imagine that CCMDD in the WC would be targeted at City Health facility which manages own budgets for facilities, separate from the province.</p> <p>There would have to be a tender process. But Medipost mentioned that there are systems in place to allow them to piggy-back in existing systems as they are already delivery to City Health clinics under the CDU program. Main difference between CDU and CCMDD, either than where the budget is managed, is the pick-up points. CDU pick-up points are managed by the province/facility rather than the service providers. They deliver everything centrally to facilities which then deal with the distribution of the medication to patients.'</p> <p>a18_additional = 'No', a19_confirmrecording = '1', a20_confirmdata = '1', a21_confirmreview = '1', a22_contact = '1', a24_timeend = '10:00'</p>
